#### **SUMMIT STATE BANK**

### **NOTES TO FINANCIAL STATEMENTS (UNAUDITED)**

#### 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

#### General

On January 15, 1999, Summit State Bank (the "Bank") received authority to transact business as a California state-chartered commercial bank and is subject to regulation, supervision and examination by the State of California Department of Financial Protection & Innovation and the Federal Deposit Insurance Corporation. The Bank was incorporated on December 20, 1982 under the name Summit Savings. The Bank provides a variety of banking services to individuals and businesses in its primary service area of Sonoma County, California. The Bank's branch locations include Santa Rosa, Petaluma, Rohnert Park, and Healdsburg. The Bank offers depository and lending services primarily to meet the needs of its business, nonprofit organization and individual clientele. These services include a variety of transaction, money market, savings and time deposit account alternatives. The Bank's lending activities are directed primarily towards commercial real estate, construction and business loans.

The financial statements as of June 30, 2023 and for the three and six months ended June 30, 2023 and 2022 are unaudited. In the opinion of management, these unaudited financial statements contain all adjustments, consisting only of normal recurring accruals necessary to present fairly the financial statements of the Bank.

The accompanying unaudited interim financial statements have been prepared in accordance with U.S. Generally Accepted Accounting Principles for interim financial information and Article 8 of Regulation S-X of the Securities and Exchange Commission. Operating results for the three and six months ended June 30, 2023 are not necessarily indicative of the results that may be expected for the year ending December 31, 2023. These unaudited financial statements do not include all disclosures associated with the Bank's annual financial statements and notes thereto and accordingly, should be read in conjunction with the financial statements and notes thereto included in the Bank's Annual Report for the year ended December 31, 2022 on Form 10-K, on file with the FDIC (the Form 10-K may also be found at www.summitstatebank.com).

The accompanying accounting and reporting policies of the Bank conform to U.S. Generally Accepted Accounting Principles and prevailing practices within the banking industry.

#### Restatement of Statement of Cash Flows

Subsequent to the issuance of the Bank's Financial Statements for the year-ended December 31, 2021, quarter ended March 31, 2022, and quarter and six-months ended June 30, 2022 (the "Affected Financial Statements"), management determined that the Statement of Cash Flows incorrectly identified the line "Proceeds from sales of loans other than loans originated for resale" within "cash flows from operating activities" versus the proper classification within "cash flows from investing activities" on the statement of cash flows. As a result, the Bank restated the Affected Financial Statements. On November 21, 2022, the Bank filed amendments to its Annual Report on From 10-K for the year ended December 31, 2021 and its Quarterly Reports on Form 10-Q for the periods ended March 31, 2022 and June 30, 2022, reflect the restatement of the Affected Financial Statements.

While misclassified, the amount of reported loans sales was not affected for any period and remains unchanged. Net cash from financing activities and net change in cash and cash equivalents

were not affected in any period. The misclassification had no effect on the Statements of Income, Statements of Comprehensive Income, Balance Sheets, or Statements of Changes in Shareholders' Equity included in the Affected Financial Statements. There was no effect on loans sold, total loans, the allowance for credit losses, total assets, total capital, regulatory capital ratios, net interest income, net interest margin, net income to shareholders, basic or diluted earnings per share, return on average assets, net income, return on average equity, the efficiency ratio, asset quality ratios or any other key performance metrics.

The accompanying unaudited interim financial statements reflect "Proceeds from sales of loans other than loans originated for resale" within "cash flows from investing activities" on the statement of cash flows consistent with U.S. Generally Accepted Accounting Principles.

#### Financial Statement Reclassifications

With the exception of the item noted above for the quarter ended June 30, 2023, no financial statement reclassifications have occurred.

#### Use of Estimates

The preparation of financial statements in conformity with U.S. Generally Accepted Accounting Principles requires management to make estimates and assumptions. These estimates and assumptions affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates. The allowance for credit losses, goodwill impairment, fair values of investment securities and the determination of potential impairment of affordable housing tax credit investment are particularly subject to change.

## **Operating Segments**

While the Bank's chief decision makers monitor the revenue streams of the Bank's various products and services, operations are managed, and financial performance is evaluated on a bank-wide basis. Operating segments are aggregated into one segment as operating results for all segments are substantially the same.

## Cash and Cash Equivalents

For the purpose of the statement of cash flows, the Bank considers cash and due from banks with original maturities under 90 days and Federal funds sold to be cash equivalents. Generally, Federal funds are sold for one-day periods. Net cash flows are reported for customer loan and deposit transactions, time deposits in banks and short-term borrowings with an original maturity of 90 days or less.

#### Investment Securities

Debt securities classified as available-for-sale are available for future liquidity requirements and may be sold prior to maturity. Purchase premiums and discounts are recognized in interest income using the interest method over the terms of the securities. Debt securities classified as available-for-sale are measured at fair value and unrealized holding gains and losses are excluded from earnings and reported net of tax as accumulated other comprehensive income (AOCI), a component of shareholders' equity, until realized. (See Note 9 Fair Value for a more complete discussion of accounting for the fair value of financial instruments.) Realized gains and losses on sale are computed on the specific identification method and are included in earnings on the trade date.

#### Allowance for Credit Losses - Available-for-Sale ("AFS") Debt Securities

For AFS debt securities in an unrealized loss position, the Bank first assesses whether it intends to sell, or is more likely than not that it will be required to sell the security before recovery of its amortized cost basis. If the Bank intends to sell the security or it is more likely than not that the Bank will be required to sell the security before recovering its cost basis, the entire impairment loss would be recognized in earnings. If the Bank does not intend to sell the security and it is not more likely that the Bank will be required to sell the security, the Bank evaluates whether the decline in fair value has resulted from credit losses or other factors. In making this assessment, management considers the extent to which fair value is less than amortized cost, any changes to the rating of the security by a rating agency, and adverse conditions specifically related to the security, among other factors. If this assessment indicates that a credit loss exists, the present value of cash flows expected to be collected from the security are compared to the amortized cost basis of the security. Projected cash flows are discounted by the current effective interest rate. If the present value of cash flows expected to be collected is less than the amortized cost basis, a credit loss exists and an allowance for credit losses is recorded for the credit loss, limited by the amount that the fair value is less than the amortized cost basis. The remaining impairment related to all other factors, the difference between the present value of the cash flows expected to be collected and fair value, is recognized as a charge to AOCI.

Changes in the allowance for credit losses are recorded as provision for (or reversal of) credit loss expense. Losses are charged against the allowance when management believes the non-collectability of an AFS security is confirmed or when either of the criteria regarding intent or requirement to sell is met.

As of June 30, 2023 and December 31, 2022, the Bank determined that the unrealized loss positions in AFS securities were not the result of credit losses, and therefore, an allowance for credit losses was not recorded. See Note 2 Investment Securities Available-for-Sale for more information.

A debt security is placed on nonaccrual status at the time any principal or interest payments become greater than 90 days delinquent. Interest accrued but not received for a security placed on non-accrual is reversed against interest income. There were no accrued interest amounts reversed against interest income for the three or six months ended June 30, 2023 or 2022. Accrued interest receivable on available-for-sale debt securities totaled \$551,000 at June 30, 2023 compared to \$559,000 at December 31, 2022 and is excluded from the estimate of credit losses as of June 30, 2023 and December 31, 2022.

## Loans

Loans that management has the intent and ability to hold for the foreseeable future or until maturity are stated at principal balances outstanding, net of deferred loan origination fees and costs and the allowance for credit losses, adjusted for accretion of discounts or amortization of premiums. Interest is accrued daily based upon outstanding loan balances. However, for all loan classes, when in the opinion of management, the future collectability of interest and principal is in serious doubt, loans are placed on nonaccrual status and the accrual of interest income is suspended. Any interest previously accrued, but unpaid, is charged against income. Payments received are applied to reduce principal to the extent necessary to ensure collection. Subsequent payments on these loans, or payments received on nonaccrual loans for which the ultimate collectability of principal is not in doubt, are applied first to earned but unpaid interest and then to principal.

Non-accrual loans and loans past due 90 days still on accrual include both smaller balance homogeneous loans that are collectively evaluated, and collateral dependent loans that are

individually evaluated for a required allowance for credit losses. A loan is moved to non-accrual status in accordance with the Bank's policy, typically after 90 days of non-payment.

For loans whose contractual terms have been restructured in a manner which grants a concession to a borrower experiencing financial difficulties, they are returned to accrual status when there has been a sustained period of repayment performance (generally, six consecutive monthly payments) according to the modified terms and there is reasonable assurance of repayment and of performance.

#### Allowance and Provision for Credit Losses – Loans and Leases

The allowance for credit losses is a valuation account that is deducted from the amortized cost basis of loans to present the net amount expected to be collected on the loans. The Bank has elected to exclude accrued interest receivable from the amortized cost basis in the estimate of the allowance for credit losses. The provision for credit losses reflects the amount required to maintain the allowance for credit losses at an appropriate level based upon management's evaluation of the adequacy of collective and individual loss reserves. The Bank's methodologies for determining the adequacy of allowance for credit losses are set forth in a formal policy and take into consideration the need for a valuation allowance for loans evaluated on a collective pool basis which have similar risk characteristics, as well as allowances that are tied to individual loans that do not share risk characteristics. The Bank increases its allowance for credit losses by charging provisions for credit losses on its statement of income. Losses related to specific assets are applied as a reduction of the carrying value of the assets and charged against the allowance for credit loss when management believes the non-collectability of a loan balance is confirmed. Recoveries on previously charged-off loans are credited to the allowance for credit losses.

Management conducts an assessment of the allowance for credit losses on a monthly basis and undertakes a more comprehensive evaluation quarterly. Management estimates the allowance for credit losses using relevant information, from internal and external sources, relating to past events, current conditions, and reasonable and supportable forecasts. The allowance for credit losses is maintained at a level sufficient to provide for expected credit losses over the life of the loan based on evaluating historical credit loss experience and making adjustments to historical loss information for differences in the specific risk characteristics in the current loan portfolio and economic conditions. These adjustments to historical loss factors include, among others, changes in the size and composition of the loan portfolio, delinquent and nonaccrual loans, and current and projected economic conditions, as well as changes in economic factors including unemployment rates, property values, Consumer Price Index, Gross Domestic Product, and treasury yields.

The allowance for credit losses is measured on a collective pool basis when similar risk characteristics exist. In estimating the component of the allowance for credit losses for loans that share common risk characteristics, loans are pooled based on loan types. For loans evaluated collectively as a pool, the allowance for credit losses is calculated using regression analysis (includes non-accrual rates, gross charge-offs and recovery rates), an estimate of the life of each loan, and historical losses adjusted for economic forecasts and current conditions.

Historical credit loss assumptions for each pool are estimated using an econometric timeseries regression analysis which establishes a correlation between non-accrual rates, gross charge-off rates, and recovery rates. This is a three-part process that first separately analyzes non-accrual rates, then calculates gross charge-off rates using the modeled non-accrual rate from the prior step, and third, calculates the recovery rate using the modeled rate from the prior step. This model implies historical values of non-accruals are directly correlated to current charge-offs, which is directly

correlated to future recoveries. In calculating these separately over time, the model incorporates the entire default cycle of a loan pool while also including the appropriate time lags between events.

The model captures a complete cycle of historical loss data and management uses economic indicators from the Office of the Comptroller of the Currency (OCC)'s Dodd-Frank Act Stress Test (DFAST) historical dataset of actual econometric national variables to adjust historical loss rates. The adjustment to historical loss rates better reflects management's expectations of future conditions over the remaining lives of the loans in the portfolio based on reasonable and supportable forecasts. These economic indicators are selected based on correlation to the Bank's historical credit loss experience and are evaluated for each loan category to ensure proper correlation relationships using economic logic. The DFAST dataset incorporates many variables including unemployment, gross domestic product, consumer price index, real estate price index, treasury yields, and mortgage rates.

The effective life of loan pool is then calculated using loans paid off from 2009 through 2016. Although the life of loan is generally considered to be the contractual maturity of a loan, the Bank's model includes expected prepayments when estimating credit loss, thereby reflecting effective maturity as opposed to contractual maturity. The average and median life of loan is calculated by loan pool.

The net charge-off rate (or gross charge-off rates minus recovery rates) is then forecasted over the life of loan pool for the entire portfolio to derive the future expected loss. The Bank uses the OCC's DFAST Base Case Scenario and Severely Adverse Scenario for forecasting future expected loss.

The Bank also incorporates qualitative factors in establishing the allowance for credit losses that management believes are reasonable and supportable at each reporting date. The following qualitative factors are considered in establishing the Bank's CECL Allowance:

- Economic Forecast Scenarios In order to produce a reasonable and supportable forecast, the Bank utilizes multiple economic forecasts to determine the appropriate level of life of loan loss reserves. The Bank will forecast out for 13 quarters and revert back to a straightline historical average beyond this timeframe. At least annually, individual economic forecast scenarios are analyzed and selected by management based on current and expected economic activity.
- Economic Forecast Weighting In order to produce a reasonable and supportable forecast, the Bank utilizes multiple economic forecasts to determine the appropriate level of life of loan loss reserves. At least annually, each individual economic forecast scenario is analyzed by management to evaluate the appropriate weighting based on current and expected economic activity. The sum of all weights will always total 100%.
- Near-term Loan Loss Stabilization In order to produce a more stable loan loss provision, management reviews the loan loss estimate of the CECL model for reasonableness and may make adjustments to estimated loss reserves in the near term based on known factors in the current portfolio.

Portfolio segmentation is defined as the level at which an entity develops and documents a systematic methodology to determine its allowance for credit losses. The Bank has designated the following portfolio segments of loans and leases by the following call report categories: nonfarm land non-owner-occupied nonresidential, nonfarm land owner-occupied nonresidential, farmland, commercial & industrial, secured multi-family, real estate – construction, agricultural production, 1-4 family residential, HELOC/revolving, 1-4 family residential junior lien, and consumer & credit cards.

The method for determining the allowance for credit losses described above is used to determine the allowance for credit losses in each portfolio segment in the Bank's loan portfolio.

Loans that do not share risk characteristics with other loans in the portfolio are individually evaluated for impairment and are not included in the collective evaluation. Factors involved in determining whether a loan should be individually evaluated include, but are not limited to, the financial condition of the borrower and the value of the underlying collateral. Expected credit losses for loans evaluated individually are measured based on the present value of expected future cash flows discounted at the loan's original effective interest rate or when the Bank determines that foreclosure is probable, the expected credit loss is measured based on the fair value of the collateral as of the reporting date, less estimated selling costs, as applicable. As a practical expedient, the Bank measures the expected credit loss for a loan using the fair value of the collateral less the cost to sell. Collateral may consist of various types of real estate including residential properties, commercial properties such as retail centers, office buildings, and lodging; agriculture land; and vacant land. The Bank assesses these loans on each reporting date to determine whether repayment is expected to be provided substantially through the operation or sale of the collateral when the borrower is experiencing financial difficulty.

In both cases, if the fair value of the collateral is less than the amortized cost basis of the loan, the Bank will recognize an allowance or partial charge-off as the difference between the fair value of the collateral, less costs to sell, if applicable, at the reporting date and the amortized cost basis of the loan. If the fair value of the collateral exceeds the amortized cost basis of the loan, any expected recovery added to the amortized cost basis will be limited to the amount previously charged-off. Subsequent changes in the expected credit losses for loans evaluated individually are included within the provision for credit losses in the same manner in which the expected credit loss initially was recognized or as a reduction in the provision that would otherwise be reported.

## Loan Origination and Commitment Fees

Loan origination fees, net of certain specifically defined direct loan origination costs, are deferred and recognized as an adjustment of the loans' interest yield using the level-yield method over the contractual term of each loan adjusted for actual loan prepayment experience. Loan commitment fees are deferred until the expiration of the commitment period unless management believes there is a remote likelihood that the underlying commitment will be exercised, in which case the fees are amortized to fee income using the straight-line method over the commitment period. If a loan commitment is exercised, the deferred commitment fee is accounted for in the same manner as a loan origination fee. Deferred commitment fees associated with expired commitments are recognized as fee income.

## Accrued Interest Receivable

The Bank has elected to present accrued interest receivable within the accrued interest receivable and other asset line on the balance sheet, separate from the associated loan balances, exclude accrued interest receivable that is included in the amortized cost of financing receivables from related disclosure requirements, and continue to write off accrued interest by reversing interest income. The Bank will not measure an allowance for credit losses for accrued interest receivable due to the Bank's policy of writing off uncollectible accrued interest receivable in a timely manner. Accrued interest receivable for the total loan portfolio was \$3,199,000 and \$3,132,000 as of June 30, 2023 and December 31, 2022, respectively.

#### Loan Sales

Non-interest income generated from gain on loan sales is a secondary contributor to net income. The Bank generates Small Business Administration ("SBA") and United States Department of Agriculture ("USDA") loans, and the guaranteed portion of these loans are generally eligible to be sold in the secondary market. Loans where the guaranteed balance is sold at a premium are recorded as a gain on loan sales whereas discounts are recorded as a loss on loan sales. The Bank determines each quarter if it will be selling any loans and which loans it will sell. The decision to sell a loan is variable and can be determined based on how loan sales will contribute to net income, reduce loan concentrations, and/or address liquidity needs.

## Affordable Housing Tax Credit Investments

The Bank invested in a limited partnership that was formed to develop and operate affordable housing projects for low or moderate-income tenants. As of June 30, 2023 the Bank's ownership percentage is 13.4%. The investment is in qualified affordable housing tax credit funds and is accounted for using the proportional amortization method, where the initial cost of the investment is amortized in proportion to the tax credits and other tax benefits received. Low-income housing tax credits and other tax benefits received, net of the amortization of the investment, is recognized as part of provision for income taxes. The partnership must meet the regulatory minimum requirements for affordable housing for a minimum 15- year compliance period to fully utilize the tax credits. If the partnership ceases to qualify during the compliance period, the credit may be denied for any period in which the project is not in compliance and a portion of the credit previously taken is subject to recapture with interest. The Bank will record an impairment charge if the value of the future tax credits, and other tax benefits is less than the carrying value of the investment. The investment totaled \$8,586,000 and \$8,881,000 at June 30, 2023 and December 31, 2022. The unfunded commitments for low-income housing tax credit funds totaled \$4,435,000 and \$4,677,000 at June 30, 2023 and December 31, 2022. The Bank did not recognize any impairment losses on these low-income housing tax credit investments during the three or six month periods ending June 30, 2023 as the value of the future tax benefits exceeds the carrying value of the investments.

## Reserve and Provision for Undisbursed Loan Commitments ("Unfunded Reserve")

The Unfunded Reserve represents the expected credit losses on off-balance sheet commitments such as unfunded commitments to extend credit (available balance on lines of credit including construction lines of credit) and standby letters of credit. The Unfunded Reserve is recognized as a liability within accrued interest payable and other liabilities in the balance sheets, with adjustments to the reserve recognized in the provision for credit losses on unfunded loan commitments in the statements of income. The Unfunded Reserve is updated each reporting period and determined by taking the maximum unfunded credit limit as of the report date and applying the expected loss rates on those draws by loan pool.

## Earnings Per Common Share

Basic earnings per common share (EPS), which excludes dilution, is computed by dividing income available to common shareholders by the weighted-average number of common shares outstanding for the period. Diluted EPS is computed by dividing income available to common shareholders by the weighted-average common shares outstanding plus the weighted average number of dilutive shares for the period. We have two forms of outstanding common stock: common stock and unvested restricted stock awards. Holders of unvested restricted stock awards receive forfeitable dividends at the same rate as common shareholders. Stock options or unvested restricted stock awards that are considered anti-dilutive, such as options whose exercise prices exceed the current

common stock price, are not included in computing diluted earnings per share as they would not reduce EPS under the treasury method. Stock options for 84,000 and 86,000 shares of common stock for the three and six months ended June 30, 2023 were not considered in computing diluted earnings per share because they were anti-dilutive. Stock options for 47,000 shares of common stock for the three and six months ended June 30, 2022 were not considered in computing diluted earnings per share because they were anti-dilutive.

The factors used in the earnings per common share computation follow:

		Three Mor	nths End	ded	Six Months Ended			
(in thousands except earnings per share)	June 30, 2023		June 30, 2022		June 30, 2023		June	30, 2022
Basic								
Net income	\$	2,985	\$	4,501	\$	7,101	\$	8,436

Basic earnings per common share	\$	0.45	\$	0.67	\$	1.06	\$	1.26
Diluted								
Net income	\$	2,985	\$	4,501	\$	7,101	\$	8,436
Weighted average common shares outstanding for basic earnings per common share (1)	-	6,697		6,687		6,689		6,686
Add: Dilutive effects of assumed exercises of stock options and restricted stock awards		3				1_		
Average shares and dilutive potential common shares		6,700		6,687		6,690		6,686
Diluted earnings per common share	\$	0.45	\$	0.67	\$	1.06	\$	1.26

<sup>(1)</sup> excludes unvested RSAs

#### Revenue Recognition

The Bank records revenue from contracts with customers in accordance with Accounting Standards Codification Topic 606, "Revenue from Contracts with Customers" ("Topic 606"). Under Topic 606, the Bank must identify the contract with a customer, identify the performance obligations in the contract, determine the transaction price, allocate the transaction price to the performance obligations in the contract, and recognize revenue when (or as) the Bank satisfies a performance obligation.

Most of the Bank's revenue-generating transactions are not subject to Topic 606, including revenue generated from financial instruments, such as loans and investment securities. In addition, certain noninterest income streams such as fees associated with mortgage servicing rights, gains on sales of loans, financial guarantees, derivatives, and certain credit card fees are also not in scope of the guidance. The Bank's noninterest revenue streams are largely based on transactional activity such as the gain on sale of the guaranteed portion of SBA loans. Consideration is often received immediately or shortly after the Bank satisfies its performance obligation and revenue is recognized. The Bank does not typically enter into long-term revenue contracts with customers, and therefore, does not experience significant contract balances. As of June 30, 2023 and December 31, 2022, the Bank did not have any significant contract balances. The Bank has evaluated the nature of its revenue streams and determined that further disaggregation of revenue into more granular categories beyond what is presented on the statements of income was not necessary. The following are descriptions of revenues within the scope of ASC 606.

Deposit service charges - The Bank earns fees from its deposit customers for account maintenance, transaction-based and overdraft services. Account maintenance fees consist primarily of account fees and analyzed account fees charged on deposit accounts monthly. The performance

obligation is satisfied, and the fees are recognized monthly as the service period is completed. Transaction-based fees on deposit accounts are charged to deposit customers for specific services provided to the customer, such as non-sufficient funds fees, overdraft fees, and wire fees. The performance obligation is completed as the transaction occurs and the fees are recognized at the time each specific service is provided to the customer.

Debit and ATM interchange fee income and expenses - Debit and ATM interchange income represent fees earned when a debit card issued by the Bank is used. The Bank earns interchange fees from debit cardholder transactions through the Visa payment network. Interchange fees from cardholder transactions represent a percentage of the underlying transaction value and are recognized daily, concurrently with the transaction processing services provided to the cardholder. The performance obligation is satisfied, and the fees are earned when the cost of the transaction is charged to the cardholders' debit card. Certain expenses directly associated with the credit and debit card are recorded on a net basis with the interchange income.

## Accounting Standards Adopted in 2023

In March 2022, the Financial Accounting Standards Board (FASB) issued ASU No. 2022-02, Financial Instruments—Credit Losses (Topic 326): Troubled Debt Restructurings and Vintage Disclosures. Since the issuance of ASU No. 2016-13, the Board of Directors has provided resources to monitor and assist stakeholders with the implementation of Topic 326, also known as Post-Implementation Review (PIR). The amendments in this update respond to feedback received during the PIR process, specifically as it pertains to eliminating accounting guidance for TDRs by creditors and adding vintage disclosures for gross write-offs. The amendments in this update are effective for the Bank for fiscal years beginning after December 15, 2022, including interim periods within those fiscal years. The adoption of this standard did not have a material effect on the Bank's operating results or financial condition. The Bank adopted this standard and included the new disclosures beginning with the first quarter of 2023.

## Accounting Standards Pending Adoption

In March 2020, the FASB issued ASU No. 2020-04, Reference Rate Reform (Topic 848). The amendments in this ASU are elective and provide optional guidance for a limited period to ease the potential burden in accounting for (or recognizing the effects of) reference rate reform. The amendments in this ASU provide optional expedients and exceptions for applying GAAP to contracts, hedging relationships, and other transactions that reference LIBOR or another reference rate expected to be discontinued because of reference rate reform. In December 2022, the FASB issued ASU No. 2022-06, Reference Rate Reform (Topic 848): Deferral of the Sunset Date of Topic 848. This update defers the sunset date of Topic 848 from December 31, 2022, to December 31, 2024. The amendments in these ASU's may be elected as of March 12, 2020 through December 31, 2024. An entity may choose to elect the amendments in this update at an interim period subsequent to March 12, 2020 with the method of adoption varying based on transaction type. The Bank has no loans and one subordinated debt agreement for \$6,000,000 or 0.5% of total assets that references LIBOR. The impact these ASU's will have on the Bank is anticipated to be minimal and the Bank has not elected to apply these amendments.

## 2. INVESTMENT SECURITIES - AVAILABLE-FOR-SALE

The amortized costs and estimated fair value of investment securities available-for-sale are reflected in the tables below; the Bank has no investment securities held-to-maturity:

			J	une 30, 2023				
(in thousands)	Amortized Cost	Gross Unrealized Gains		Gross Unrealized Losses	Allowance for Credit Losses	Estimated Fair Value		
Government agencies	\$ 62,220	\$	-	\$ 10,482	\$ -	\$ 51,738		
Mortgage-backed securities - residential	9,688		-	1,551	-	\$ 8,137		
Corporate debt	25,478		11	1,771	-	\$ 23,718		
Total investment securities available-for-sale	\$ 97,386	\$	11	\$ 13,804	\$ -	\$ 83,593		
			Dec	ember 31, 2022	1, 2022			
		Gross		Gross	Allowance			
	Amortized	Unrealiz	ed	Unrealized	for Credit	Estimated		
(in thousands)	Cost	Gains		Losses	Losses	Fair Value		
Government agencies	\$ 62,171	\$	3	\$ 10,825	\$ -	\$ 51,349		
Mortgage-backed securities - residential	9,834		-	1,574	-	\$ 8,260		
Corporate debt	26,012		5	1,841		\$ 24,176		
Total investment securities available-for-sale	\$ 98,017	\$	8	\$ 14,240	\$ -	\$ 83,785		

The activity related to recorded gross gains and losses of investment securities is reflected in the table below:

	Three Months Ended				Six Months Ended				
(in thousands)	June 30, 202		June 30, 2022		June 30, 2023		June 30, 2022		
Proceeds from calls	\$	-	\$	-	\$	-	\$	411	
Gross realized gains on sales and calls		_		_		_		6	

The unrealized loss on the investment portfolio including asset backed securities, corporates, and agencies were generally caused by changes in required yields by investors for these types of securities and changes in interest rates. All the Bank's securities remain investment grade with the exception of one security that has a par value of \$250,000. The one security below investment grade has been separately evaluated and management has determined it is not expected to incur a credit loss. An allowance for credit loss will not be recorded because the issuing company continues to perform financially and the Bank expects to realize the full principal and interest upon final maturity. The Bank continues to monitor all its securities for changes in credit rating or other indications of credit deterioration.

Management has concluded the decline in fair value of its investment securities is attributable to changes in short-term interest rates, market shifts of the treasury yield curve and other variable market and economic conditions. Management further concludes unrealized losses did not result from any significant or persistent deterioration in the underlying credit quality of any of the investments, the portfolio consists primarily of debt securities with non-contingent contractual cash flows, and full realization of the principal balance is expected upon final maturity. The Bank has no specific plans to sell any of its securities in an unrealized loss position, is not anticipating it will be required to sell these securities prior to full recovery, and has the intent and ability to hold the securities until it receives full recovery, which could be at the final maturity or prior to maturity for

investments with a make-whole call provision. For the reasons described, the Bank has determined none of the individual unrealized loss as of June 30, 2023 will result in a credit loss and the Bank did not record an allowance for credit losses recorded as of June 30, 2023 with respect to such securities.

Investment securities with unrealized losses are summarized and classified according to the duration of the loss period as follows:

		June 30, 2023									
	Less thar	n 12 Months	12 Mont	ths or More	Total						
		Unrealized	Fair	Unrealized		Unrealized					
(in thousands)	Fair Value	Losses	Value	Losses	Fair Value	Losses					
Available-for-sale:											
Government agencies	\$ 17,612	\$ (458)	\$34,126	\$ (10,024)	\$ 51,738	\$ (10,482)					
Mortgage-backed securities - residential	920	(55)	7,217	(1,496)	8,137	(1,551)					
Corporate debt	6,328	(196)	16,819	(1,575)	23,147	(1,771)					
Total investment securities	\$ 24,860	\$ (709)	\$58,162	\$ (13,095)	\$ 83,022	\$ (13,804)					
			Deceml	ber 31, 2022							
	Less thar	n 12 Months	12 Mont	ths or More	Total						
		Unrealized	Fair	Unrealized		Unrealized					
(in thousands)	Fair Value	Losses	Value	Losses	Fair Value	Losses					
Available-for-sale:											
Government agencies	\$ 14,623	\$ (561)	\$29,723	\$ (10,264)	\$ 44,346	\$ (10,825)					
Mortgage-backed securities - residential	3,201	(301)	5,059	(1,273)	8,260	(1,574)					
Corporate debt	19,223	(1,080)	4,394	(761)	23,617	(1,841)					
Total investment securities	\$ 37,047	\$ (1,942)	\$39,176	\$ (12,298)	\$ 76,223	\$ (14,240)					

At June 30, 2023, investment securities with a fair value of \$7,388,000 were pledged to secure public deposits and represented 8.8% of the investment portfolio. At December 31, 2022, investment securities with a fair value of \$7,315,000, or 8.7% of the investment portfolio, were pledged.

At June 30, 2023, the Bank held twenty-one investment securities in an unrealized loss position for less than 12 months and sixty-three investment securities in an unrealized loss position greater than 12 months.

The amortized cost and estimated fair value of investment securities by contractual maturity at June 30, 2023 are shown below. Expected maturities will differ from contractual maturities because the issuers of the securities may have the right to call or prepay obligations with or without call or prepayment penalties.

(in thousands)	Amo	rtized Cost	 imated r Value
Within one year	\$	503	\$ 493
After one year through five years		30,716	29,327
After five years through ten years		19,491	17,841
After ten years		36,988	 27,795
		87,698	75,456
Investment securities not due at a single maturity date:			
Mortgage-backed securities - residential		9,688	 8,137
	\$	97,386	\$ 83,593

The Bank does not own securities of any single issuer (other than U.S. Government agencies) whose aggregate book value was in excess of 10% of the Bank's total shareholders' equity at the time of purchase.

#### 3. LOANS

Outstanding loans are summarized as follows:

	June 30,	December 31,
(in thousands)	2023	2022
Commercial & agricultural (1)	\$ 135,122	\$ 132,314
Real estate - commercial	665,239	625,880
Real estate - construction and land	36,914	65,632
Real estate - single family	60,907	62,827
Real estate - multifamily	41,784	41,329
Consumer & lease financing (2)	101	564
	940,067	928,546
Allowance for credit losses	(15,261)	(14,839)
	\$ 924,806	\$ 913,707

<sup>(1)</sup> Includes loans secured by farmland. Also includes all PPP loans, totaling \$4,117 as of June 30, 2023 and \$5,822 as of December 31, 2022.

The following is a discussion of the risks across each loan portfolio segment:

Commercial and Agricultural Loans – Commercial and agricultural credit is extended to commercial customers for use in normal business operations to finance working capital needs, equipment purchases, farmland, or other projects. Most of these borrowers are customers doing business within the Bank's geographic locations. These loans are generally underwritten individually and secured with the assets of the company and the personal guarantee of the business owners. Commercial and agricultural loans are made based primarily on the historical and projected cash flow of the borrower and the underlying collateral provided by the borrowers. The cash flows of borrowers may not occur as expected, or the collateral securing these loans may fluctuate in value. A weakened economy, and the resulting decrease in consumer or business spending, may also have an impact on the credit quality of commercial and agricultural loans.

<sup>(2)</sup> Consumer & lease financing includes overdrafts of \$99 as of June 30, 2023 and \$562 as of December 31, 2022.

In 2021 the Bank participated in the Small Business Administration's ("SBA") Paycheck Protection Program ("PPP"). PPP loans have terms of two to five years and earn interest at 1%. In addition, the SBA paid the Bank a fee of 1%-5% depending on the loan amount, which was netted with loan origination costs and accreted/amortized into interest income using the effective yield method over the contractual life of each loan. The recognition of fees and costs is accelerated when the SBA forgives the loan and/or the loan is paid off prior to maturity. PPP loans are fully guaranteed by the SBA and have virtually no risk of loss. As expected, a majority of PPP loans were forgiven by the SBA and the Bank has \$4,117,000 in remaining PPP loan balances, or 0.4% of total loans, as of June 30, 2023.

Commercial and Multifamily Real Estate Loans – Commercial and multifamily real estate loans are subject to underwriting standards and processes similar to commercial loans. These loans are viewed primarily as cash flow loans and the repayment of these loans is largely dependent on the successful operation of the property. Loan performance may be adversely affected by factors impacting the general economy or conditions specific to the real estate market.

Construction and Land Real Estate Loans – Construction and land real estate loans are extended to qualified commercial and individual customers and are underwritten and secured by the assets of the company or individual. Commercial construction credits are generally secured with personal guarantees of the business owner. Credits are underwritten to meet the general credit policy criteria for current and projected cash flow coverage and loan-to-value. Both types of credit are generally written as construction to permanent loans with terms consistent with policy and property type.

The Bank extends construction loans to borrowers in California, Arizona, Texas and Washington with a majority under the SBA 7(a) or U.S. Department of Agriculture (USDA) loan guarantee programs. The majority of land real estate loans are with customers doing business within the Bank's geographic region, Northern California. Repayment of construction loans is largely dependent on the ultimate success of the project and can be impacted by the inherent volatility in real estate values, delays due to weather, and labor or material shortages.

Single Family Real Estate Loans – Single family residential mortgage loans represent loans to consumers for the purchase or refinance of a residence. These loans are generally financed up to 30 years, and in most cases, are extended to borrowers to finance their primary residence. Real estate market values at the time of origination directly affect the amount of credit extended, and in the event of default, subsequent changes in these values may impact the severity of losses. Additionally, commercial loans may be categorized as Single Family Residential if the loan is secured by a mortgage on a home. Commercial loans categorized as Single Family Residential are underwritten as described in Commercial and Agricultural Loans section above and have terms such as interest rates and maturities as a standard Commercial Loan.

Consumer and Lease Financing Loans – The bank is no longer involved in consumer lending of this type. However, the bank has a small legacy portfolio and this balance will adjust based on changes in investment provisions or reversals. Consumer and lease financing loans are primarily comprised of loans made directly to consumers. These loans have a specific underwriting matrix which consists of several factors including debt to income, type of collateral and loan to collateral value, credit history and relationship to the borrower. Consumer and lease financing lending uses risk-based pricing in the underwriting process. Consumer and lease financing loans are impacted by factors that impact consumers' ability to repay the loans, such as unemployment rates.

Changes in the allocation of allowance for credit losses by loan class for the three and six months ended June 30, 2023 and 2022 are as follows:

A loan is considered past due if a scheduled payment of interest or principal that is due is unpaid for 30 days or more.

For the three and six months ended June 30, 2023, there were no loan modifications to borrowers experiencing financial difficulty. For the three and six months ended June 30, 2023 and June 30, 2022, there were no payment defaults on modified loans to borrowers experiencing financial difficulty.

## **Credit Quality Indicators**

The Bank categorizes loans into risk categories based on relevant information about the ability of borrowers to service their debt such as: current financial information, historical payment experience, credit documentation, public information, and current economic trends, among other factors. The Bank analyzes loans individually by classifying the loans as to credit risk. This analysis is performed on a quarterly basis for loans in excess of \$100,000. Smaller balances are graded at origination and updated based on payment status and other information obtained from borrowers. The Bank uses the following definitions for risk ratings:

**PASS** - Loans not meeting any of the three criteria below that are analyzed individually as part of the above described process are considered to be pass rated loans.

**SPECIAL MENTION** - Loans in this category are considered "criticized" from a regulatory point of view but are not considered "classified" until the risk classification becomes substandard or worse. Loans in this category represent above average risk and potential weakness which may, if not corrected, weaken the loan and threaten repayment at some future date.

**SUBSTANDARD** - Loans in this category have a well defined weakness that jeopardize full repayment of the debt, although loss may not seem likely. Loss potential does not have to exist in individual loans in the Substandard classification but will be apparent in the aggregate. Typically, these loans have not met repayment plans as agreed. The primary source of repayment may have failed to materialize; repayment may be dependent on collateral liquidation or other secondary sources. Bankrupt borrowers and those with continuously past due payments are considered substandard.

**DOUBTFUL** - Loans in this category have all the characteristics of substandard loans with the added weakness that payment in full or liquidation in full is highly questionable and improbable. The possibility of loss is extremely high, but because of certain important and reasonably specific pending factors, which may work to the strengthening of the loan, its classification as an estimated loss is deferred until the amount of the loss may be more accurately determined.

The following tables present the Bank's portfolio by loan type, risk category, and year of origination, as of June 30, 2023. Revolving loans that are converted to term loans are treated as new originations in the table below:

## **Pledged Loans**

The Bank maintains two lines of credit where the line is secured by pledging qualifying loans with unpaid principal balances. The first line is held at the Federal Home Loan Bank (FHLB) and secured under terms of a blanket collateral agreement; loans with unpaid principal balances of \$437,991,000 at June 30, 2023 and \$437,324,000 at December 31, 2022 are pledged to secure the line of credit with the FHLB. The second line is held at the Federal Reserve Bank of San Francisco (FRB) and secured under terms of a Borrower-in-Custody arrangement; loans with unpaid principal balances of \$248,877,000 at June 30, 2023 and \$225,234,000 at December 31, 2022 secure the line of credit with FRB.

### **Related Party Loans**

The Bank has, and expects to have, in the future, banking transactions in the ordinary course of its business with non-employee Directors, Executive Officers, principal shareholders, as well as their businesses, associates, and members of their immediate family. The Bank makes available an Employee Loan Program which offers preferred interest rates on primary home mortgage loans; this program is compliant with the applicable restrictions of Section 22(h) of the Federal Reserve Act. Prior to August 1, 2020, non-employee Directors were also eligible to participate in the Bank's Employee Loan Program; after August 1, 2020, non-employee Directors are no longer eligible to participate in this program. Otherwise, all other transactions, including loans and commitments to lend, are made in the ordinary course of business on the same terms, including interest rates and collateral, as those prevailing at the same time for comparable transactions with other persons of similar creditworthiness not related to the Bank. These transactions do not involve more than the normal risk of collectability or present other unfavorable features. Loans to individual non-employee Directors and Executive Officers must comply with the Bank's lending policies and statutory lending limits. In addition, in some cases, prior approval of the Bank's Board of Directors must be obtained for such loans, as required by federal and state regulations applicable to the Bank.

Related party loans totaled \$3,673,000 at June 30, 2023 and \$3,724,000 at December 31, 2022. Undisbursed commitments to related parties were \$475,000 at June 30, 2023 and \$500,000 at December 31, 2022.

#### 4. LEASES

A lease is defined as a contract, or part of a contract, that conveys the right to control the use of identified property, plan or equipment for a period of time in exchange for consideration.

The types of leases where the Bank is a lessee are real estate properties for four branches located in Healdsburg, Rohnert Park, Petaluma and Santa Rosa, office spaces in Santa Rosa, a lending office in Roseville and photocopier equipment. These leases have variable terms maturing prior to 2029. The Bank's leases do not include residual value guarantees or covenants. A majority of the leases are classified as operating leases.

The calculated amount of the right-of-use ("ROU") assets and lease liabilities in the table below are calculated by discounting the minimum contractual balance due of all future payments through the end of the current term to present value. When the Bank determines exercising the renewal option for any lease agreement is reasonably certain, it will include the extended term in the calculation of the ROU asset and lease liability.

As it pertains to the discount rate, Topic 842 requires the use of the rate implicit in the lease whenever this rate is readily determinable. As this rate is rarely determinable, the Bank uses its incremental borrowing rate in calculating the discounted present value. The discount rate is determined at the lease commencement date and is not changed during the life of the lease unless the lease period is modified.

Cash payments from subleases originated by the Bank are recorded as rental income and included in the non-interest income. Rental income is recognized in the month in which the revenue covers. Leasehold improvements and operational expenses associated with the rental property are recorded separate from the income as an expense.

The following table represents the balance sheet classification of the Bank's ROU assets and lease liabilities. The Bank elected not to include short-term leases (i.e., leases with initial terms of twelve months or less) on the balance sheet.

(in thousands)		une 30, 2023	December 31, 2022

#### 5. BORROWINGS AND OTHER OBLIGATIONS

### **Federal Home Loan Bank Borrowings**

The Bank uses FHLB advances to manage balance sheet liquidity. Each advance is payable at its maturity date, with a prepayment penalty for fixed rate advances. The line was collateralized by \$437,991,000 and \$437,324,000 of loans under a blanket lien arrangement at June 30, 2023 and December 31, 2022. Based on this collateral, the Bank was eligible to borrow up to a total of \$263,880,000 and \$253,721,000 of which \$238,687,000 and \$197,529,000 was available for additional advances as of June 30, 2023 and December 31, 2022, respectively.

There were no advances outstanding from the FHLB at June 30, 2023 and \$41,000,000 at December 31, 2022.

#### **Federal Reserve Line of Credit**

The Bank has a secured line of credit with the Federal Reserve Bank of San Francisco secured by certain agricultural, real estate, construction, and land loans. The line was collateralized by \$248,877,000 and \$225,234,000 of loans under a Borrower-in-Custody arrangement at June 30, 2023 and December 31, 2022, respectively. The Bank had borrowing capacity under this line totaling \$97,435,000 and \$92,639,000 at June 30, 2023 and December 31, 2022, respectively, and had no outstanding borrowings with the Federal Reserve Bank at either period end date.

#### Federal Funds Purchased - Unsecured Borrowings

The Bank has an unsecured line of credit with a correspondent bank for overnight borrowings totaling \$15,000,000 at June 30, 2023 and December 31, 2022. In general, the interest rate on this line approximates the federal funds target rate. The Bank had no overnight borrowing under this credit facility as of June 30, 2023 or December 31, 2022.

### **Subordinated Debenture**

On June 28, 2019, the Bank completed a private placement of \$6,000,000 in fixed-to-floating rate subordinated notes (the "Notes") to support organic growth and for general corporate purposes.

The Notes are for a 10-year term and have been structured to qualify as Tier 2 capital for regulatory purposes. The Notes bear interest at a fixed rate of 6.0% per annum for the first half of the term and adjust to a floating rate tied to SOFR beginning July 1, 2024. Interest is payable quarterly in arrears and due on March 31, June 30, September 30, and December 31 of each year through the maturity date. The Notes are redeemable by the Bank at its option, in whole or in part, on or after June 30, 2024, or in whole but not in part under certain other circumstances. The Notes are reported net of any unamortized debt issuance cost which totaled \$87,000 and \$95,000 at June 30, 2023 and December 31, 2022.

## **Other Obligations**

The Bank leases certain premises and equipment under finance leases, which are included in borrowings and other obligations in the statements of income, See Note 4 Leases, for additional information.

#### 6. COMMITMENTS AND CONTINGENCIES

The Bank is subject to legal proceedings and claims which arise in the ordinary course of business. In the opinion of management, the amount of ultimate liability with respect to such actions will not materially affect the financial condition or results of operations of the Bank.

The Bank's business activity is primarily with clients located within Northern California. Although the Bank has a diversified loan portfolio, a significant portion of its clients' ability to repay loans is dependent upon the real estate market and various economic factors within Sonoma County. Generally, loans are secured by various forms of collateral. The Bank's credit policy requires sufficient collateral to be obtained as necessary to meet the Bank's relative risk criteria for each borrower. The Bank's collateral for the lending portfolio consists primarily of real estate, accounts receivable, inventory and other financial instruments. At June 30, 2023, loans with real estate collateral approximated \$882,129,000 or 94% of the loan portfolio compared to \$876,157,000 or 94% at December 31, 2022.

The Bank is a party to financial instruments with off-balance-sheet risk in the normal course of business in order to meet the financing needs of its clients and to reduce its own exposure to fluctuations in interest rates. These financial instruments consist of commitments to extend credit and standby letters of credit. These instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized on the balance sheets.

The Bank's exposure to credit loss in the event of nonperformance by the other party for commitments to extend credit and standby letters of credit is represented by the contractual amount of those instruments. The Bank uses the same credit policies in making commitments and standby letters of credit as it does for loans included on the balance sheet.

Commitments to extend credit, which totaled \$110,736,000 and \$110,046,000 at June 30, 2023 and December 31, 2022, respectively, are agreements to lend to a client as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since some of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The Bank evaluates each client's creditworthiness on a case-bycase basis. The amount of collateral obtained, if deemed necessary by the Bank upon extension of the credit, is based on management's credit evaluation of the borrower. Collateral held relating to these commitments varies, but may include securities, equipment, accounts receivable, inventory

and deeds of trust on residential real estate and owner-occupied or income-producing commercial properties.

Standby letters of credit, which totaled \$23,463,000 at June 30, 2023 and \$16,039,000 at December 31, 2022, are conditional commitments issued by the Bank to guarantee the performance of a client to a third party. The credit risk involved in issuing standby letters of credit is essentially the same as that involved in extending loans to clients. The fair value of the liability related to these standby letters of credit, which represents the fees received for issuing the guarantees, was not significant at June 30, 2023 and December 31, 2022. The Bank recognizes these fees as revenue over the term of the commitment or when the commitment is used.

#### 7. SHAREHOLDERS' EQUITY

### **Regulatory Capital**

At June 30, 2023, The Bank's capital levels exceeded the minimums necessary to be considered well capitalized under the regulatory framework for prompt corrective action. To be categorized as well capitalized, the Bank must maintain minimum common equity Tier 1 capital, total risk-based, Tier 1 risk-based and Tier 1 leverage ratios as set forth below.

The Bank elected not to include Accumulated Other Comprehensive Income in the regulatory capital calculations.

The Bank's actual and required capital amounts and ratios consisted of the following:

	June 30,	2023	December 31, 202					
(in thousands)	Amount	Ratio	Amount	Ratio				
Common Equity Tier 1 Capital Ratio								
Summit State Bank	\$ 96,128	9.4%	\$ 90,636	9.4%

Minimum regulatory requirement	\$ 45,967	4.0%	\$ 42,483	4.0%				

### **Stock-Based Compensation Plans**

The shareholders approved the 2023 Equity Incentive Plan ("Plan") on May 22, 2023. The Plan allows for various equity-based incentives such as options, stock appreciation rights (SARs), restricted stock awards (RSAs), restricted stock units, and other stock-based awards. The Plan reserves a total of 330,000 shares of common stock for issuance to Bank employees and directors. There are 330,000 shares that remain available for future grants under the Plan at June 30, 2023.

The Plan requires that the award exercise price may not be less than the fair value of the stock at the date it is granted. Awards have vesting periods of 5 years, unless otherwise approved by the Board of Directors. Expiration dates are determined by the Board of Directors but may not be later than ten years from the date of grant. 51,400 awards were granted during the six months ended June 30, 2023 and 50,160 awards were granted during the same period ended June 30, 2022 with 2,200 awards forfeited during that same period.

## Stock-Based Compensation Plans - Stock Appreciation Rights

Prior to 2021, the Bank granted Stock Appreciation Rights "SARs" to executive officers and directors. SARs provide long-term incentives to the employees and directors by providing a cash payment for the difference between the market price of the Bank's common stock at time of exercise and the price at the grant date. SARs expire ten years from the date of grant, and typically have an annual vesting of 20% per year, unless otherwise approved by the Board of Directors. SARs granted to the Board of Directors typically vested immediately in their entirety or partially vest immediately with annual vesting for the next two years; these SARs also have an expiration of ten years. The compensation expense is accrued quarterly as a liability.

Vested SARs are settled in the form of cash payments when the Bank receives written notification from an employee to exercise a SAR payment, the tenth anniversary of the effective date, or at termination of employment. Obligations associated with SARs are accounted for as liabilities and are included in accrued interest payable and other liabilities on the balance sheet. The Bank's SARs are valued based on the number of vested shares times the fair value of the stock price as of the report date. The Bank discontinued issuing SARs beginning 2021 and instead has been issuing RSAs; because of this there were no SAR grants for the six months ended June 30, 2023 or 2022.

The fair value of each vested SAR award is estimated quarterly using a closed form option valuation (Black-Scholes) model. The output of this valuation is updated quarterly and based on the Bank's actual historical stock price volatility, days to expirations, strike price, the current dividend yield, and the discount rate based on the current U.S. Treasury yield curve that matches the remaining term of each tranche.

At June 30, 2023 and December 31, 2022, the total SAR liability was \$1,080,000 and \$1,206,000, respectively. The total compensation expense accrued for the three and six months ending June 30, 2023 related to SARs was \$273,000 and (\$126,000), respectively. For the three and six months ended June 30, 2022, total compensation expense accrued was (\$454,000) and (\$8,000), respectively. The decrease in the SAR liability at June 30, 2023 is due to the Bank's stock price decreasing to \$15.11 at June 30, 2023 compared to \$15.80 at December 31, 2022. The Bank's SAR expense accrual increased to \$1,080,000 at June 30, 2023 compared to \$748,000 at June 30, 2022; the increase was primarily due to the Bank's stock price increasing from one year ago and 33,000 SARs vesting for the twelvemonths ended June 30, 2023.

As of June 30, 2023 and December 31, 2022, there was \$265,000 and \$324,000, respectively, of total unrecognized compensation costs related to SARs granted.

There were SAR agreements based on 302,500 common shares as of June 30, 2023 and December 31, 2022. Of the SAR agreements, there were 247,500 vested and 55,000 unvested as of June 30, 2023 and 243,100 vested and 59,400 unvested as of December 31, 2022.

## **Stock-Based Compensation Plans – Restricted Stock Awards**

Beginning 2022 the Board started issuing Restricted Stock Awards "RSAs" in lieu of SARs as long-term equity incentives to key employees and directors. All vested and unvested RSAs are

included in the common share count. RSAs vest in five equal installments on each of the first five anniversaries of the grant date. Holders are entitled to dividends on the same per-share ratio as holders of common stock, dividends for unvested RSAs will accrue at grant and be paid out at the time of vesting. Unvested RSAs and the associated accrued but unpaid dividends are forfeited if the grantee's service with the Bank is terminated prior to the vesting of the RSAs.

There were 51,400 RSAs awarded during the six months ended June 30, 2023 and 50,160 RSAs awarded during the six months ended June 30, 2022.

There were 99,340 RSAs outstanding as of June 30, 2023 and 47,940 December 31, 2022; this includes a total of 101,560 RSAs granted with 2,220 forfeited and 12,148 vested. As of June 30, 2022, there were 47,940 RSAs outstanding or exercisable.

As of June 30, 2023 and December 31, 2022, there was \$1,234,000 and \$643,000 of total unrecognized compensation costs related to non-vested RSAs granted, respectively. There was \$754,000 total unrecognized compensation costs as of June 30, 2022.

All RSAs are released in the form of stock upon vesting. The Bank will recognize an income tax deduction in an amount equal to the taxable income reported by the holders of the restricted stock, generally when vested or settled.

The following table presents unvested restricted stock awards activity for the periods indicated:

	Number of Shares	Weighted-Average Price per Share					
Outstanding Balance, December 31, 2022	44,740	\$	16.90				
Granted	51,400	\$	13.85				
Vested	(8,948)	\$	16.90				
Forfeited		\$					
Outstanding Balance, June 30, 2023	87,192	\$	15.10

Other expenses		244		207		503		531
	\$	2,180	\$	1,571	\$	3,755	\$	3,484

#### 9. FAIR VALUE

Accounting standards establish a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:

Level 1: Quoted prices (unadjusted) for identical assets or liabilities in active markets that the entity has the ability to access as of the measurement date.

Level 2: Significant other observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data.

Level 3: Significant unobservable inputs that reflect a reporting entity's own assumptions about the assumptions that market participants would use in pricing an asset or liability.

The fair values of securities available for sale are determined by a third-party vendor who uses matrix pricing, which is a mathematical technique widely used in the industry to value debt securities without relying exclusively on quoted prices for the specific securities but rather by relying on the securities' relationship to other benchmark quoted securities (Level 2 inputs). Management periodically reviews the pricing information received from third-party pricing services and tests those prices against other sources to validate the reported fair values.

The fair value of loans that are collateral dependent are generally based on real estate appraisals. The allowance for credit losses is calculated on an individual loan basis based on the shortfall between the fair value of the loan's collateral, less cost to sell, and the amortized cost. If the fair value of the collateral is greater than the amortized cost, no allowance is required. Appraisals may utilize a single valuation approach or a combination of approaches including comparable sales, primarily for owner occupied properties, and the income approach, primarily for non-owner-occupied loans. Adjustments are routinely made in the appraisal process by the appraisers to adjust for differences between the comparable sales and income data available. Such adjustments are usually significant and typically result in a Level 3 classification of the inputs for determining fair value.

Collateral values are subject to market forces or other circumstances that may cause deterioration in the value of the collateral, such as cap rates, vacancy and general economic weakness. Deterioration in valuations could result in additional reserves or charge off of a portion of the loan to the extent the amortized cost exceeds the fair value of collateral.

Commercial real estate loans can be secured by owner occupied or non-owner occupied commercial real estate. Typically, owner occupied commercial real estate loans are secured by office buildings, warehouses, manufacturing facilities and other commercial and industrial properties occupied by operating companies. Non-owner occupied commercial real estate loans are generally secured by office buildings and complexes, retail facilities, hotels, multifamily, complexes, land under development, industrial properties, as well as other commercial or industrial real estate.

Residential real estate loans are typically secured by first mortgages, and in some cases could be secured by a second mortgage.

Individually assessed loans declined to \$25,000,000 and are primarily due to three large relationships; however, the fair value of the collateral was well in excess of the amortized cost resulting in modest increase to reserves for individually assessed loans.

Estimated fair values are disclosed for financial instruments for which it is practicable to estimate fair value. These estimates are made at a specific point in time based on relevant market data and information about the financial instruments. These estimates do not reflect any premium or discount that could result from offering the Bank's entire holdings of a particular financial instrument for sale at one time, nor do they attempt to estimate the value of anticipated future business related to the instruments. In addition, the tax ramifications related to the realization of unrealized gains and losses can have a significant effect on fair value estimates and have not been considered in any of these estimates.

Because no active market exists for a significant portion of the Bank's financial instruments, fair value estimates are based on judgments regarding current economic conditions, risk characteristics of various financial instruments and other factors. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and therefore cannot be determined with precision. Changes in assumptions could significantly affect the fair values presented.

The following table presents a summary of the carrying value and fair value by level of financial instruments on the Bank's balance sheet at June 30, 2023 and December 31, 2022:

		June 30, 2023		December 31, 2022			
(in thousands)	Carrying Amount	Fair Value	Fair Value Hierarchy	Carrying Amount	Fair Value	Fair Value Hierarchy

No liabilities were measured at fair value on a recurring basis at June 30, 2023 or December 31, 2022.

There were no transfers between Level 1 and Level 2 or Level 3 during the three or six months ended June 30, 2023 or 2022.

# Assets and Liabilities Measured on a Non-Recurring Basis

There were no assets or liabilities measured at fair value on a non-recurring basis at June 30, 2023 and December 31, 2022.

#### 10. SUBSEQUENT EVENTS

# **Dividend**

On July 24, 2023, the Board of Directors declared a \$0.12 per common share cash dividend to shareholders of record at the close of business on August 10, 2023, to be paid on August 17, 2023. There were 6,784,099 shares outstanding as of the record date totaling \$802,000 in dividend costs or 27% of net income for the current quarter.

# Big Poppy Bancorp, Inc.'s Federal Reserve Application

On July 14, 2023, Big Poppy Holdings, Inc. ("Poppy") issued a public notice stating that it holds 332,464 shares of the Summit's common stock, which is approximately 4.9% of the outstanding shares, and that it intends to file an application with the Federal Reserve Board to acquire up to 24.99% of Summit's common stock with the intent to "acquire control of Summit State Bank". Poppy is the holding company for Poppy Bank, which is headquartered in Santa Rosa, California.

Summit issued a press release on July 27, 2023 stating that Summit's Board of Directors will review Poppy's application and may comment on or respond to the application in due course.

# Item 2 Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion provides additional information about the financial condition of the Bank at June 30, 2023 and December 31, 2022, and results of operations for the three and six months ended June 30, 2023 and 2022. The following analysis should be read in conjunction with the financial statements of the Bank and with the audited financial statements and accompanying notes included in our 2022 Annual Report on Form 10-K, which were prepared in accordance with U.S. Generally Accepted Accounting Principles. The interim financial information provided as of and for the three and six months ended June 30, 2023 and 2022 are unaudited. In the opinion of management of the Bank, the interim financial information presented reflects all adjustments (consisting solely of normal recurring accruals) considered necessary for a fair representation of the results of such periods.

All references to yields, cost of liabilities and net interest margin are annualized for the periods discussed.

Forward Looking Statements. This report includes forward-looking statements within the meaning of the "safe harbor" provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, that are based on the current beliefs of the Bank management as well as assumptions made by and information currently available to the Bank's management. When used in this discussion, the words "anticipate," "believe," "estimate," "expect," "should," "intend," "project," "may," "will," "would," variations of such words and words or phrases of similar meaning constitute forward-looking statements. Although the Bank believes the expectations reflected in such forward-looking statements are reasonable, it can give no assurance that such expectations will prove to be correct.

These forward-looking statements may relate to, among other things, expectations regarding the Bank's disclosure controls and procedures and the remediation plans and efforts with respect to such controls and procedures; the business environment in which the Bank operates, projections of future performance, potential future performance, potential future credit experience and perceived opportunities in the market. Factors that may cause actual results to vary from forward-looking statements include, but are not limited to, management's ability to identify and successfully remediate any deficiencies in the Bank's disclosure controls and procedures, changes in interest rates, general economic and business conditions, changes in business strategy or development plans, changes in credit quality, the availability of capital to fund the Bank's business, legislative and regulatory changes such as the Coronavirus Aid, Relief and Economic Security Act of 2020, government monetary and fiscal policies, natural disasters such as wildfires and earthquakes, interruptions of utility service in our markets for sustained periods, pandemics such as COVID-19 and the economic impact caused by the pandemic and by government responses thereto, real estate valuations, competition in the financial services industry, demographic changes, technological factors including external fraud and cybersecurity threats, civil disturbances or terrorist threats or

acts, or apprehension about the possible future occurrences of acts of this type, outbreak or escalation of hostilities in which the United States is involved, any declaration of war by the U.S. Congress or any other national or international calamity, crisis or emergency, and other risks referenced in this report.

All statements other than statements of historical fact are forward-looking statements. Such statements involve inherent risks and uncertainties, many of which are difficult to predict and are generally beyond our control. We caution readers that a number of important factors could cause actual results to differ materially from those expressed in, implied or projected by such forward-looking statements. Risks and uncertainties include, but are not limited to:

- adverse developments affecting the banking industry, such as the failure of several banks in the first quarter of 2023;
- the adverse impact of a pandemic and governmental responses to the pandemic on the Bank and its customers, employees and third-party service providers;
- the Bank's ability to manage liquidity;
- adverse changes in the market for real estate, which serves as collateral for the loans that we make;
- disruptions and instability in the banking industry;
- the effects of potential recessionary conditions;
- lower revenues than expected;
- credit quality deterioration, which could cause an increase in the allowance and provision for credit losses;
- competitive pressure among depository institutions increases significantly;
- the cost of additional capital;
- · changes in the interest rates and inflation;
- asset/liability repricing risks;
- legislative or regulatory requirements or changes adversely affecting our business;
- · changes in the securities markets;
- general economic conditions, either nationally or in the market areas in which we do or anticipate doing business, are less favorable than expected;
- · potential weakness of real estate collateral values;
- the economic and regulatory effects of terrorism, events of war and civil unrest;
- our ability to complete any future acquisitions, to successfully integrate acquired entities, or to achieve expected synergies and operating efficiencies within expected timeframes or at all.

Also, other important factors that could cause actual results to differ materially from the Bank's expectations are disclosed under Item 1A. "RISK FACTORS," in our Annual Report on Form 10-K for the year ended December 31, 2022 on file with the Federal Deposit Insurance Corporation ("FDIC"), Item 1A of Part II of this report, and below under this "MANAGEMENT'S DISCUSSION AND

ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS – *Critical Accounting Policies*" and elsewhere in this report.

If any of these risks or uncertainties materialize, or if any of the assumptions underlying such forward-looking statements prove to be incorrect, our results could differ materially from those expressed in, implied, or projected by, such forward-looking statements. We assume no obligation to update such forward-looking statements.

Forward-looking statements are not guarantees of performance. By their nature, they involve risks, uncertainties, and assumptions. Our future results and shareholder values may differ significantly from those expressed in these forward-looking statements. You are cautioned not to put undue reliance on any forward-looking statement. Any such statement speaks only as of the date of this discussion, regardless of the time of delivery of this document. We do not undertake any obligation to update or release any revisions to any forward-looking statements, to report any new information, future event or other circumstances after the date of this filing or to reflect the occurrence of unanticipated events, except as required by law. However, your attention is directed to any further disclosures made on related subjects in any subsequent reports we may file with the FDIC, including on Forms 10-K, 10-Q, and 8-K.

Government and Regulatory Oversight. The Bank is subject to regulatory oversight by the Department of Financial Protection & Innovation (DFPI) of the State of California and the Federal Deposit Insurance Corporation (FDIC). These regulatory bodies periodically perform examinations of the Bank. There is a potential that a regulatory examination may derive different estimates than those reached by management and could require material adjustments or restatements.

*Critical Accounting Policies.* The discussion and analysis of the Bank's results of operations and financial condition are based upon financial statements which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these financial statements requires the Bank's management to make estimates and judgments that affect the reported amounts of assets and liabilities, income and expense, and the related disclosures of contingent assets and liabilities at the date of these financial statements.

The Bank believes these estimates and assumptions to be reasonably accurate; however, actual results may differ from these estimates under different assumptions or circumstances. Material estimates that are particularly susceptible to significant change in the near-term relate to the determination of the allowance for credit losses, consideration of goodwill impairment, consideration of potential impairment of investment securities and determination of potential impairment of affordable housing tax credit investment.

Allowance for Credit Losses. The Bank's process for determining the adequacy of the allowance for credit losses is set forth in a formal credit policy. Loans with similar risk characteristics are evaluated on a collective pool basis and the allowance for credit losses is calculated using a life of loan estimate based on actual historical losses adjusted for economic forecasts and current conditions. The allowance for credit losses was \$15,261,000 at June 30, 2023 compared to \$14,839,000 at December 31, 2022.

The Bank maintains the allowance for credit losses at a level that is estimated to be sufficient to absorb expected credit losses associated with the Bank's loan portfolio. Additions to the allowance for credit losses are established through a provision for credit losses on its statements of income. All loans which are judged to be uncollectible are charged against the allowance while any recoveries are credited to the allowance. The Bank's policy is to charge-off any known losses at the time of determination. Any unsecured loan more than 90 days delinquent in payment of principal or

interest and not in the process of collection is charged-off in total. Collateral-dependent loans are individually evaluated for impairment to determine the ultimate loss potential (or the collateral's fair value less cost to sell) to the Bank subsequent to the liquidation of collateral. In those cases where management believes the Bank is inadequately protected, a charge-off will generally be made to reduce the loan balance to a level equal to the liquidation value of the collateral, unless management believes the collateral deficiency may be overcome by borrower cash flows.

The Bank's credit policy provides procedures designed to evaluate and assess the credit risk factors associated with the loan portfolio, enable the Bank to assess such credit risk factors prior to granting new loans, evaluate the sufficiency of the allowance for credit losses and maintain the allowance for credit losses at an appropriate level. The Bank conducts an assessment of the allowance for credit losses on a monthly basis and undertakes a more critical evaluation quarterly. At the time of the quarterly review, the Board of Directors examine and formally approve the adequacy of the allowance. Management estimates the allowance for credit losses using relevant information, from internal and external sources, relating to past events, current conditions, and reasonable and supportable forecasts. The allowance for credit losses is maintained at a level sufficient to provide for expected credit losses over the life of the loan based on evaluating historical credit loss experience and making adjustments to historical loss information for differences in the specific risk characteristics in the current loan portfolio. These adjustments to historical loss factors include, among others, changes in the size and composition of the loan portfolio, delinquent and nonaccrual loans, and current and projected economic conditions, as well as changes in economic factors including unemployment rates, property values, Consumer Price Index, Gross Domestic Product, and treasury yields.

A portion of the allowance for credit losses is based on qualitative factors that are adjusted due to volatility and uncertainty in the Bank's loan portfolio and the market that management believes is reasonable and supportable. These qualitative factors include the economic forecast scenarios, economic forecast weighting, and near-term loan loss stabilization.

#### **Results of Operations**

# Three and six months ended June 30, 2023 and June 30, 2022

The Bank's primary source of income is net interest income, which is the difference between interest income and fees derived from earning assets and interest paid on liabilities which fund those assets. Net interest income, expressed as a percentage of total average interest earning assets, is referred to as the net interest margin. The Bank's net interest income is affected by changes in the volume and mix of interest earning assets and interest-bearing liabilities. It is also affected by changes in yields earned on interest earning assets and rates paid on interest bearing deposits and other borrowed funds. The Bank also generates non-interest income, including transactional fees, service charges, office lease income and gains and losses on loans and investment securities. Non-interest expenses consist primarily of employee compensation and benefits, occupancy and equipment expenses and other operating expenses. The Bank's results of operations are also affected by its provision for credit losses. Results of operations may also be significantly affected by other factors including general economic and competitive conditions, natural disasters such as fires, floods, and earthquakes, interruptions of utility service in our markets for sustained periods, pandemics, mergers and acquisitions of other financial institutions within the Bank's market area, changes in market interest rates, government policies, and actions of regulatory agencies.

#### **Net Income**

A summary of the net income and annualized ratios are as follows:

	Three Months Ended						Six Months Ended				
(Dollars in thousands)		June 30, 2023		e 30, 2022	Change	June 30, 2023		June 30, 2022		Change	
Net income	\$	2,985	\$	4,501	\$(1,516)	\$	7,101	\$	8,436	\$(1,335)	
Earnings per diluted share	\$	0.45	\$	0.67	\$ (0.22)	\$	1.06	\$	1.26	\$ (0.20)	
Annualized return on average assets		1.03%		1.85%	(0.82)%		1.25%		1.76%	(0.51)%	
Annualized return on average common shareholders' equity		12.69%		21.26%	(8.57)%		15.47%		19.98%	(4.51)%	

# **Net Interest Income and Net Interest Margin**

Net interest income decreased \$638,000 or 6% for the three months ended June 30, 2023 compared to June 30, 2022 and decreased \$485,000 or 2% for the six months ended June 30, 2023. The annualized net interest margin was 3.44% for the three months ended June 30, 2023, compared to 4.36% for the same period of 2022. The annualized net interest margin was 3.56% for the six months ended June 30, 2023, compared to 4.32% for the same period in 2022. The difference in net interest income remains relatively flat when comparing the six months ending June 30, 2023 to June 30, 2022 due to the growth in interest income equaling the growth in interest expense. Interest income growth was primarily attributable to an increase in the loan portfolio volume due to organic loan growth and increased returns on loans, investments, and deposits with banks. The increase in interest expense was due to increasing the volume of total deposits at the Bank and the cost to fund these deposits for both non-maturing deposits and maturing CD's.

Average earning assets increased 19% to \$1,125,327,000 and 18% to 1,114,790,000 for the three and six months ended June 30, 2023, respectively. For the three months ended June 30, 2023, the annualized yield on average earning assets was 5.57% and the annualized cost of average interest-bearing liabilities was 2.90%, as compared to the annualized yield on average earning assets of 4.80% and annualized cost of interest-bearing liabilities of 0.66% for the same period of 2022. For the six months ended June 30, 2023, the annualized yield on average earning assets was 5.48% and the annualized cost of average interest-bearing liabilities was 2.65%, as compared to the annualized yield on average earning assets of 4.76% and annualized cost of interest-bearing liabilities of 0.66% for the same period of 2022.

The annualized rate on loans increased to 5.78% for the three months ended June 30, 2023 when compared to 5.16% for the same period in 2022. The increase is primarily attributable to the increase in rate indices and the direct impact this has on the Bank's new loans and adjustable rate loans. The annualized rate on loans increased to 5.72% for the six months ended June 30, 2023 when compared to 5.12% for the same period in 2022.

Interest income increased to \$15,625,000 or 38% for the three months ended June 30, 2023 compared to June 30, 2022. The increase is attributable to a \$2,607,000 increase in core loan interest yield primarily driven by increased rates, a \$1,388,000 increase in interest on deposits with banks due to increased yields, and a \$284,000 increase in investment and dividend income due to increased yields.

Interest income increased to \$30,274,000 or 36% for the six months ended June 30, 2023 compared to June 30, 2022. The increase is attributable to a \$5,128,000 increase in core loan interest yield primarily driven by increased rates, a \$2,282,000 increase in interest on deposits with banks due to increased yields, and a \$638,000 increase in investment and dividend income due to increased yields.

Interest expense for the three months ended June 30, 2023 was \$5,961,000, an increase of \$4,917,000 from \$1,044,000 for the three months ended June 30, 2022. Interest expense on deposits for the three months ended June 30, 2023 was \$5,819,000. Interest expense on deposits for the three months ended June 30, 2022 was \$750,000. The average cost of deposits, including the impact of noninterest bearing deposits, for the three months ended June 30, 2023, was 2.26% compared to 0.37% for the three months ended June 30, 2022.

Interest expense for the six months ended June 30, 2023 was \$10,573,000, an increase of \$8,533,000 from \$2,040,000 for the six months ended June 30, 2022. Interest expense on deposits for the six months ended June 30, 2023 was \$10,219,000. Interest expense on deposits for the six months ended June 30, 2022 was \$1,460,000. The average cost of deposits, including the impact of noninterest bearing deposits, for the six months ended June 30, 2023, was 2.65% compared to 0.37% for the six months ended June 30, 2022. A majority of the increase in the cost of funds for the three and six months ended June 30, 2023 was the result of a significant increase in time deposit volume, increasing to an average balance of \$410,640,000 at June 30, 2023 from \$191,129,000 at June 30, 2022 and the total cost of funds for time deposits increasing to 3.51% and 3.35% for the three and six months ended June 30, 2023 compared to 0.74% and 0.72% for the same periods in 2022. The cost of interest-bearing demand deposits, savings, and money market also increased in response to increases in federal rates and competitor rates.

The following table presents condensed average balance sheet information for the Bank, together with interest rates earned and paid on the various sources and uses of its funds for each of the periods presented. Average balances are based on daily average balances. Nonaccrual loans are included in loans with any interest collected reflected on a cash basis.

Net interest spread (3)				2.83%			4.10%

<sup>(1)</sup> Average balances on loans outstanding include non-performing loans. The net amortization of deferred fees on loans included in interest income was \$257,000 and \$487,000 for the six months ended June 30, 2023 and 2022, respectively.

<sup>(2)</sup> Net interest margin is computed by dividing net interest income by average total earning assets.

<sup>(3)</sup> Net interest spread is the difference between the average rate earned on average total earning assets and the average rate paid on average total interest-bearing liabilities.

<sup>(4)</sup> Annualized.

The following tables show the change in interest income and interest expense and the amount of change attributable to variances in volume and rates. The unallocated change in rate or volume variance has been allocated between the rate and volume variances in proportion to the absolute dollar amount of the change of each.

# Volume and Yield/Rate Variances Comparison of the Three Months Ended June 30, 2023 to June 30, 2022

#### **Provision for Credit Losses**

The Bank maintains an allowance for credit losses to absorb expected credit losses associated with the Bank's loan portfolio. Adjustments to the allowance for credit losses are made through a charge or credit against income referred to as the provision for credit losses. Loan write-offs are charged against the allowance for credit losses and recoveries are credited to the allowance; the provision is not directly impacted in either case. The allowance is adjusted periodically to reflect changes in the volume of outstanding loans and estimated losses resulting from life of loan estimates of losses which are adjusted for economic forecasts and current conditions.

There was \$0 and \$400,000 provision for credit losses for the three and six months ended June 30, 2023, respectively compared to \$988,000 and \$1,123,000 provision for credit losses for the three and six months ended June 30, 2022, respectively. Most of the decrease in the allowance for credit loss was due to slowing growth in the loan portfolio and adjusting the Bank's qualitative factors in response to recent economic changes, primarily due to negative trends in the CPI inflation rate. There were \$24,908,000 in nonperforming loans at June 30, 2023 compared to \$570,000 nonperforming loans at June 30, 2022. The increase in nonperforming loans is primarily related to two large relationships in which payments became past due more than 90 days. With the exception of \$603,000, the loans added to non-accrual during the quarter are well secured by real estate and the bank does not anticipate taking a loss. There were no charge-offs for the six months ended June 30, 2023 and gross charge-offs of \$21,000 for the same period in 2022. There were gross recoveries

of \$22,000 during the six months ended June 30, 2023 compared to \$21,000 for the same period in 2022. See Balance Sheet Activity – Nonperforming Assets and Allowance for Credit Losses for additional discussion.

Future provisions for credit losses are dependent on factors such as asset quality trends, loan portfolio growth and the general condition of the economy, such as the potential for a recession or post-pandemic economic impacts. The Bank expects more variability in its quarterly provision for credit losses going forward due to the CECL model's sensitivity to changes in the economic forecast. Also, since a significant portion of the Bank's loan portfolio is collateralized by real estate, the valuation of the underlying collateral can have a significant impact on the adequacy of the allowance for credit losses and specific allocations for collateral dependent loans, which may require additional future credit loss provisions.

#### Non-interest Income

The following are the sources of non-interest income for the periods indicated:

	Three Months Ended Six Months Ended								s Ended	ed		
(in thousands)	June	30, 2023	June	30, 2022	Cha	nge	June	30, 2023	June	30, 2022	Ch	nange
Service charges on deposit accounts	\$	215	\$	213	\$	2	\$	422	\$	422	\$	_
Rental income		39		45		(6)		79		123		(44)
Net gain on loan sales		-		1,953	(1,	953)		1,435		3,499	(	2,064)
Net gain on securities		-		-		-		-		6		(6)
Other income		1,195		143	1,	052		1,473		258		1,215
Total non-interest income	\$	1,449	\$	2,354	\$ (	905)	\$	3,409	\$	4,308	\$	(899)

The decrease in non-interest income during the three and six months ended June 30, 2023 compared to 2022 was primarily due to lower loan sale activity on SBA guaranteed loans in 2023 offset by \$1,023,000 FHLB fee income for prepayment of long term advances in 2023.

#### **Non-interest Expense**

The following are the sources of non-interest expense for the periods indicated:

		Three Months Ended					Six Months Ended					
(in thousands)	June	30, 2023	June	30, 2022	Ch	ange	June	30, 2023	June	30, 2022	Change	
Salaries and employee benefits	\$	4,199	\$	3,311	\$	888	\$	7,992	\$	7,275	\$ 717	
Occupancy and equipment		442		416		26		894		826	68	
Information technology		508		512		(4)		969		992	(23)	
Director fees and expenses		331		(20)		351		374		378	(4)	
Marketing and donations		385		363		22		612		670	(58)	
Professional fees		460		318		142		869		574	295	
Other expenses		497		398		99		931		870	61	
Total non-interest expense	\$	6,822	\$	5,298	\$1	,524	\$	12,641	\$	11,585	\$1,056	

Non-interest operating expenses increased \$1,524,000 and \$1,056,000 between the three and six month periods of 2023 and 2022, respectively. The increase for the three month period was primarily due to recording employee and director RSA grants, and an increase in the liability for employee and director SARs due to an increase in the Bank's stock trading price. The increase for the six month period was primarily due to an increase in employee RSA and SAR expenses and an increase in professional fees offset by a decrease in directors RSA and SAR expense.

#### **Provision for Income Taxes**

The Bank accrues income tax expense based on the anticipated annual tax rates during the financial period covered. The provision for income taxes for Federal and State corporate income tax and effective rates for the three and six months ended June 30, 2023 were \$1,271,000 (29.9%) and \$2,966,000 (29.5%) compared to \$1,859,000 (29.2%) and \$3,364,000 (28.5%) for the same period in 2022. The increase in the effective tax rate for 2023 was due to the Bank recording a onetime credit in the first quarter of 2022 of \$86,000 taken for a carryover of prior year taxes due to a change in estimate.

#### **Balance Sheet Activity**

#### At June 30, 2023 and December 31, 2022

#### **Investment Portfolio**

Securities classified as available-for-sale for accounting purposes are recorded at their fair value on the balance sheet. Available-for-sale (AFS) investment securities carried at fair value totaled \$83,593,000 and amortized cost of \$97,386,000 at June 30, 2023 and comprised 7.2% of total assets. At December 31, 2022, investment securities comprised 7.5% of total assets with AFS investments at a fair value of \$83,785,000 and amortized cost of \$98,017,000. Changes in the fair value of AFS securities (e.g., unrealized holding gains or losses) are reported as "other comprehensive income (loss)," net of tax, and carried as accumulated other comprehensive income or loss, net of tax, within shareholders' equity until realized, unless a credit loss exists and an allowance for credit loss is recorded. The Bank's accumulated other comprehensive loss has decreased to (\$9,710,000) at June 30, 2023, from (\$10,019,000) at December 31, 2022. The significant and sustained amount of the Bank's unrealized losses on its AFS investments has been caused by the drastic increase in interest rates in 2022 and 2023. The Bank has no specific plan to sell any of its securities, does not anticipate it will be required to sell any securities prior to full recovery, and has the intent and ability to hold all securities until full recovery. Because of this, the unrealized losses are anticipated to remain in the equity section of the balance sheet and not impact the income statement.

The Bank limits risk in its investment security portfolio by holding a modest portion of assets in security investments, diversifies investments across various types of securities, diversifies corporate investments across various industries, and limits exposure on corporate debt by capping investments to a maximum of \$750,000 per issuer.

There were no bonds purchased, \$637,000 in bonds called or matured and no bonds sold during the six months ended June 30, 2023. For the six months ended June 30, 2022, there were \$10,953,000 in bonds purchased, \$1,172,000 in bonds were called or matured and no bonds sold. There were no net gains on the called bonds for the six months ended June 30, 2023. There were net gains of \$6,000 on the called bonds for the six months ended June 30, 2022.

The Bank utilizes the investment portfolio to manage liquidity and attract funding that requires collateralization. At June 30, 2023, investment securities with a fair value of \$7,388,000 were pledged to secure public deposits and represented 8.8% of the investment portfolio. At December 31, 2022, investment securities with a fair value of \$7,315,000, or 8.7% of the investment portfolio, were pledged. At June 30, 2023 investment securities with a fair value of \$52,920,000 were callable within one year.

#### **Loan Portfolio**

The following table shows the composition of the loan portfolio by amount, percentage of total loans for each major loan category and the dollar volume and percentage change between the dates indicated.

							Net	Percent
(in thousands)	June 30	0, 2023	%	Decemb	er 31, 2022	%	Change	Change
Commercial & agricultural (1)	\$	135,122	14.4%	\$	132,314	14.2%	\$ 2,808	2.1%
Real estate - commercial		665,239	70.6%		625,880	67.3%	39,359	6.3%
Real estate - construction and land		36,914	4.0%		65,632	7.1%	(28,718)	(43.8)%
Real estate - single family		60,907	6.5%		62,827	6.8%	(1,920)	(3.1)%
Real estate - multifamily		41,784	4.4%		41,329	4.5%	455	1.1%
Consumer & lease financing (2)		101	0.0%		564	0.1%	(463)	(82.1)%
		940,067	100%		928,546	100%	11,521	1.2%
LESS:								
Allowance for Credit Losses		(15,261)			(14,839)		(422)	2.8%
Total Loans, Net	\$	924,806		\$	913,707		\$11,099	1.2%

<sup>(1)</sup> Includes loans secured by farmland. Also includes all PPP loans, totaling \$4,117 as of June 30, 2023 and \$5,822 as of December 31, 2022.

Gross loans increased \$11,521,000 (1.2%) to \$940,067,000 at June 30, 2023 from December 31, 2022. The increase was predominately in the real estate – commercial loan category.

Through June 30, 2023, the Bank received \$127,054,000 in PPP forgiveness payments from the SBA. The Bank does not expect to receive any additional forgiveness from the SBA on the remaining PPP balance of \$4,117,000.

At June 30, 2023, the Bank had approximately \$110,736,000 in undisbursed loan commitments, of which approximately \$52,260,000 were commercial and agricultural and \$35,03,000 related to real estate loan types. At December 31, 2022, the Bank had approximately \$110,046,000 in undisbursed loan commitments, of which approximately \$55,331,000 were commercial and agricultural and \$38,666,000 related to real estate loan types.

### **Nonperforming Assets**

Nonperforming assets consist of nonperforming loans and other real estate owned. Nonperforming loans are those for which the borrower fails to perform under the terms of the obligation and consist of nonaccrual loans and accruing loans past due 90 days or more.

<sup>(2)</sup> Consumer & lease financing includes overdrafts of \$99 as of June 30, 2023 and \$562 as of December 31, 2022.

The following are the nonperforming assets for the respective periods:

(in thousands)	une 30, 2023	Dec	ember 31, 2022
Nonaccrual Ioans	\$ 24,908	\$	3,756
Accruing loans past due 90 days or more			
Total nonperforming loans	24,908		3,756
Other real estate owned	 _		-
Total nonperforming assets	\$ 24,908	\$	3,756
Nonperforming loans to total loans	2.65%		0.40%
Nonperforming assets to total assets	2.14%		0.34%
Allowance for credit losses to nonperforming loans	61.27%		395.09%

Nonperforming assets were \$24,908,000, or 2.14% of total assets, at June 30, 2023, and consisted of ten loans; one loan totaling \$3,189,000 is a real estate secured commercial loans, two loans totaling \$5,960,000 are real estate secured construction and land loans and seven loans totaling \$15,759,000 are commercial and agriculture secured loans. There are five relationships in non-accrual with four in various stages of the foreclosure process and one small SBA loan of \$570,000 is current on payment plan. One loan, \$3,200,000 that is in the foreclosure process is now expected to be brought current in the third quarter of 2023 after the borrower won a large settlement against the city for damage to the property. The three remaining relationships are in the early stages of foreclosure with one \$6,000,000, a newly constructed hotel in Phoenix, AZ, that is likely to be sold or refinanced, due to significant equity, prior to foreclosing. There were \$3,756,000 in nonperforming assets at December 31, 2022.

There was no other real estate owned (OREO) at June 30, 2023 or December 31, 2022.

#### Allowance for Credit Losses

The Bank's processes for determining the adequacy of the allowance for credit losses are set forth in a formal credit policy. Loans with similar risk characteristics are evaluated on a collective basis with similar risk characteristics and the allowance for credit losses is calculated using an estimate of the life of loan losses based on actual historical losses adjusted for economic forecasts and current conditions. The allowance for credit losses was \$15,261,000 at June 30, 2023 compared to \$14,839,000 at December 31, 2022.

The Bank maintains the allowance for credit losses to absorb expected credit losses associated with the Bank's loan portfolio. Additions to the allowance for credit losses are established through a provision for credit losses on its statement of income. All loans which are judged to be uncollectible are charged against the allowance while any recoveries are credited to the allowance. The Bank's policy is to charge-off any known losses at the time of determination. Any unsecured loan more than 90 days delinquent in payment of principal or interest and not in the process of collection is charged-off in total. Collateral-dependent loans are individually evaluated for impairment to determine the ultimate loss potential to the Bank subsequent to the liquidation of collateral. In those cases where management believes the Bank is inadequately protected, a charge-off will generally be made to reduce the loan balance to a level equal to the liquidation value of the collateral, unless management believes the collateral deficiency may be overcome by borrower cash flows.

The Bank's credit policy provides procedures designed to evaluate and assess the credit risk factors associated with the loan portfolio, enable the Bank to assess such credit risk factors prior to granting new loans, evaluate the sufficiency of the allowance for credit losses and maintain the allowance for credit losses at an appropriate level. The Bank conducts an assessment of the allowance for credit losses on a monthly basis and undertakes a more critical evaluation quarterly. At the time of the quarterly review, the Board of Directors examines and formally approves the adequacy of the allowance. Management estimates the allowance for credit losses using relevant information, from internal and external sources, relating to past events, current conditions, and reasonable and supportable forecasts. The allowance for credit losses is maintained at a level sufficient to provide for expected credit losses over the life of the loan based on evaluating historical credit loss experience and making adjustments to historical loss information for differences in the specific risk characteristics in the current loan portfolio. These adjustments to historical loss factors include, among others, changes in the size and composition of the loan portfolio, delinquent and nonaccrual loans, and current and projected economic conditions, as well as changes in economic factors including unemployment rates, property values, Consumer Price Index, Gross Domestic Product, and treasury yields.

A portion of the allowance for credit losses is based on qualitative factors that are adjusted due to volatility and uncertainty in the Bank's loan portfolio and the market that management believes is reasonable and supportable. These qualitative factors include the economic forecast scenarios, economic forecast weighting, and net-term loan loss stabilization.

The following table summarizes the activity in the Allowance for Credit Losses during the periods indicated.

#### SUMMARY OF ACTIVITY IN ALLOWANCE FOR CREDIT LOSSES

Total	\$	15,261	100%	\$	14,839	100%			

The allowance allocation is highly dependent on the current loan balance, net charge-off rate, and contractual loan terms, adjusted for expected prepayments when appropriate. The specific loan pools evaluated at one period versus another can result in variations in the allocations. Different loan pools have different loss expectations in a rising rate environment and at times of economic uncertainty. The increase in allowance is primarily attributable to an overall increase in expected losses due to current market conditions and an increase in nonperforming assets during the quarter. A smaller portion of the increase in allowance was allocated to real estate – commercial due to the increase in loan balances for the six months ended June 30, 2023. The decline in allowance allocated to real estate – construction and land was due to the reduced amount of loans and balances within this pool.

In addition to the allowance for credit losses, the Bank maintains a reserve for undisbursed loan commitments, which is reported in other liabilities on the balance sheets. This allowance was \$437,000 at June 30, 2023 and \$435,000 at December 31, 2022.

#### **Deposits**

At June 30, 2023, the Bank had a deposit mix of 39% in time deposits, 41% in money market and savings accounts, and 20% in demand accounts. At December 31, 2022, the Bank had a deposit mix of 38% in time deposits, 21% in money market and savings accounts, and 41% in demand accounts.

The following table sets forth the maturities of time deposits of \$100,000 or more outstanding at June 30, 2023 and December 31, 2022.

#### Maturity of Time Deposits of \$100,000 or More

(in thousands)		ie 30, 2023	December 31, 2022			
Time deposits of \$100,000 or more maturing in:						
Three months or less	\$	110,653	\$	40,256		
Over three through six months		165,456		60,367		
Over six to twelve months		45,182		165,618		
Over twelve months		30,671		47,049		
Total time deposits of \$100,000 or more	\$	351,962	\$	313,290		

At June 30, 2023, the Bank had \$37,380,000 in wholesale brokered deposits compared to \$55,116,000 at December 31, 2022.

The Bank also obtains time deposits through an internet listing service. These deposits are primarily from other financial institutions. There were \$2,738,000 and \$13,944,000 of internet obtained deposits at June 30, 2023 and December 31, 2022, respectively.

The Bank's strategy is actively focused on increasing its funding from local deposits, lower its dependance on wholesale funding, increase liquidity and increase market share. Strategies employed to increase local deposits include non-profit business accounts that provides annual donation awards for average balances, offering time deposit products with competitive rates, promoting 12-month term time deposits, and continued focus on increasing customer retention and new customers through training staff.

Approximately 78% of the Bank's deposit balances are insured by the FDIC as of June 30, 2023. The Bank holds a high percentage of insured deposits because it offers local customers with deposits in excess of \$250,000 the option to enroll in deposit placement service programs called Certificate of Deposit Accounts Registry Services ("CDARS") and Insured Cash Sweep ("ICS"). Enrolling in these programs allows customer funds to go into certificates of deposit or demand accounts issued by other banks in the CDARS and ICS network in increments of less than \$250,000, so that both principal and interest are eligible for complete FDIC protection. The network banks exchange deposits on a dollar-for-dollar basis, bringing the full amount of the original deposit back to the originating bank. Because the originating bank comes out "whole," it can make the full amount of deposits received available for community lending purposes or other initiatives of its choosing. Deposits placed using CDARS and ICS meet the pass-through insurance coverage guidelines established by the FDIC and the depositor can obtain up to a total of \$150,000,000 in FDIC insurance coverage. The deposits received by the Bank from other network members in exchange for the Bank's customers' deposits placed in the program are not considered as brokered deposits for FFIEC Call Report purposes. At June 30, 2023 there was \$115,391,000 in CDARS time deposits and \$148,235,000 in ICS demand deposits.

The following table sets forth the estimated deposits exceeding the FDIC insurance limit at June 30, 2023 and December 31, 2022.

(in thousands)	June 30, 2023			December 31, 2022			
Uninsured deposits	\$	226,056	\$	263,659			

#### Shareholder's Equity

Total shareholders' equity increased \$5,889,000 to \$94,435,000 at June 30, 2023 compared to \$88,546,000 at December 31, 2022. The increase in shareholders' equity was primarily a result of net income for the second quarter of 2023 and a decrease of \$309,000 in accumulated other comprehensive loss offset by a \$1,643,000 payout of cash dividends.

#### **Liquidity and Capital Resources**

Maintenance of adequate liquidity requires that sufficient resources be available at all times to meet cash flow requirements of the Bank. Liquidity in a banking institution is required primarily to provide for deposit withdrawals and the credit needs of customers and to take advantage of

investment opportunities as they arise. A bank may achieve desired liquidity from both assets and liabilities. Cash and deposits held in other banks, Federal funds sold, other short-term investments, maturing loans and investments, payments of principal and interest on loans and investments, and potential loan and investment securities sales are sources of asset liquidity. Deposit growth and access to credit lines established with correspondent banks, primarily with the FHLB and FRB, and access to brokered certificates of deposit are sources of liability liquidity. The Bank reviews and manages its liquidity position on a regular basis based upon its current position and expected trends of loans and deposits. Management believes that the Bank maintains adequate sources of liquidity to meet its liquidity needs.

The Bank can borrow from the Federal Reserve Discount Window by pledging investment securities or loans. The Bank is eligible to pledge the value of its unpledged agency securities at an amount that is dependent on the value of the security. As of June 30, 2023, the value of the unpledged agency securities that are eligible to be pledged to the Federal Reserve were \$44,350,000. As of June 30, 2023, no securities were pledged to the Federal Reserve.

The Bank's liquid assets, defined as cash and cash equivalents, deposits with banks, Federal funds sold and the market value of unpledged available-for-sale investment securities, totaled \$188,617,000 and constituted 16% of total assets at June 30, 2023 compared to \$100,851,000 or 10% of total assets at June 30, 2022.

At June 30, 2023, the Bank had \$351,315,000 in borrowing lines of credit from the FHLB, FRB, and correspondent banks with no outstanding advances. At December 31, 2022, the lines of credit available were \$346,360,000 with \$41,000,000 in FHLB advances outstanding.

Cash was primarily provided in the first six months of 2023 by \$28,498,000 in proceeds from SBA loan sales, \$45,236,000 increase in certificates of deposits and \$40,425,000 increase in demand, savings, and money market deposits. Cash was used in the first six months of 2023 to fund \$37,033,000 of loan originations net of repayments and \$41,000,000 in repayment of long term FHLB advances.

Cash was primarily provided in the first six months of 2022 by \$52,557,000 in proceeds from SBA loan sales, \$14,787,000 increase in certificates of deposits and \$10,100,000 increase in FHLB advances. Cash was used in the first six months of 2022 to fund \$65,029,000 of loan originations net of repayments, \$10,953,000 in new investment securities and \$2,185,000 paid for affordable housing tax credit investment.

Additional information on the Bank's cash flows can be reviewed in the *Statement of Cash Flows* in Part I, Item 1 of this report.

The following table presents the capital ratios for the Bank and the corresponding regulatory minimum requirements:

	June 30,	2023	December 3	December 31, 2022			
(in thousands)	Amount	Ratio	Amount	Ratio			
Common Equity Tier 1 Capital Ratio							
Summit State Bank	\$ 96,128	9.4%	\$ 90,636	9.4%			
Minimum requirement with capital conservation buffer	\$ 71,563	7.0%	\$ 67,452	7.0%			
Minimum requirement for "Well-Capitalized" institution	\$ 66,452	6.5%	\$ 62,634	6.5%			
Minimum regulatory requirement	\$ 46,005	4.5%	\$ 43,362	4.5%			
Tier 1 Capital Ratio							
Summit State Bank	\$ 96,128	9.4%	\$ 90,636	9.4%			
Minimum requirement with capital conservation buffer	\$ 86,898	8.5%	\$ 81,906	8.5%			
Minimum requirement for "Well-Capitalized" institution	\$ 81,787	8.0%	\$ 77,088	8.0%			
Minimum regulatory requirement	\$ 61,340	6.0%	\$ 57,816	6.0%			
Total Capital Ratio							
Summit State Bank	\$ 114,856	11.2%	\$ 108,626	11.3%			
Minimum requirement with capital conservation buffer	\$ 107,345	10.5%	\$ 101,177	10.5%			
Minimum requirement for "Well-Capitalized" institution	\$ 102,233	10.0%	\$ 96,360	10.0%			
Minimum regulatory requirement	\$ 81,787	8.0%	\$ 77,088	8.0%			
Tier 1 Leverage Ratio							
Summit State Bank	\$ 96,128	8.4%	\$ 90,636	8.5%			
Minimum requirement for "Well-Capitalized" institution	\$ 57,459	5.0%	\$ 53,104	5.0%			
Minimum regulatory requirement	\$ 45,967	4.0%	\$ 42,483	4.0%			

The Bank's capital is supplemented through the retention of net income less dividends paid. The Bank's common dividend declared on July 24, 2023 was \$0.12 per share or \$814,000.

# Impact of Inflation

The primary impact of inflation on the Bank is its effect on interest rates. The Bank's primary source of income is net interest income, which is affected by changes in interest rates. The Bank attempts to limit the impact of inflation on its net interest margin through management of rate-sensitive assets and liabilities and analyses of interest rate sensitivity. The effect of inflation on premises and equipment as well as on non-interest expenses has not been significant for the periods presented.

#### Item 3 Quantitative and Qualitative Disclosures about Market Risk

Proper management of the rate sensitivity and maturities of assets and liabilities is required to provide an optimum and stable net interest margin. Interest rate sensitivity spread management is an important tool for achieving this objective and for developing ways in which to improve profitability. Management has assessed its market risk at June 30, 2023 and believes that there has been no material change in its liability-sensitive position since December 31, 2022.

The Bank constantly monitors earning asset and deposit levels, developments and trends in interest rates, liquidity, capital adequacy and marketplace opportunities. Management responds to all of these to protect and possibly enhance net interest income while managing risks within acceptable levels as set forth in the Bank's policies. In addition, alternative business plans and transactions are contemplated for their potential impact. This process is known as asset/liability management and is carried out by changing the maturities and relative proportions of the various types of loans, investments, deposits and borrowings in the ways described above. Risks associated with interest rate changes and market risk are managed through the Bank's Interest Rate Risk Management Policy. This policy is reviewed and approved at least annually by the Board. The Board also monitors and establishes target positions for interest rate and market value risks through the Asset Liability Committee of the Board.

The tool most used to manage and analyze the interest rate sensitivity of a bank is known as a computer simulation model. To quantify the extent of risks in both the Bank's current position and transactions it might make in the future, the Bank uses a model to simulate the impact of different interest rate scenarios on net interest income. The hypothetical impact of an interest rate shock for incremental interest rate changes up to +/- 4.00% is modeled quarterly, representing the primary means the Bank uses for interest rate risk management decisions.

In addition to measuring net interest income changes, the Bank also uses the economic value of equity ("EVE") ratio to stress test longer-term interest rate risk exposure on capital. Stress testing EVE will show the impact that fluctuating interest rates will have on the Bank's capital and give insight into the Bank's earning capacity and risk. This ratio is calculated by taking in difference in the net present value of asset cash flows (loan and investment securities) and liability cash flows (deposits and borrowings). Major assumptions used in determining fair values include maturities, repricing periods, and decay rates of non-maturity deposits. As the calculation is highly dependent on assumptions, as well as the change in the shape of the yield curve being modeled, it is not considered to be an exact calculation and instead is used as an interest rate risk monitoring tool.

Based on results of the quarterly model, the Bank is asset sensitive during a one and two-year period, meaning that during that timeframe more assets will reprice than liabilities. Asset sensitive banks typically expect an increase in the net interest margin if rates increase and the net interest margin would decline when rates decline. If the Bank were liability sensitive, the opposite would occur and the bank would expect an increase in the net interest margin if rates decline, and the net interest margin would decline when rates increase. Various factors influence the change in the Bank's margin when general market interest rates change. These factors include, but are not limited to, the growth and mix of new assets, deposit liabilities and borrowings, the extension or contraction of maturities of new and renewed assets and liabilities, the shape of the general economic yield curve, and the general influence on pricing by competition in the local market for loans and deposits. Additionally, when economic rates change, there is an immediate impact from loans that are tied to a daily prime lending or other index rate. The repricing of liabilities to offset this change requires time for deposits to mature and renew.

When preparing the model, the Bank makes significant assumptions about the lag in the rate of change and impacts of optionality in various asset and liability categories. The Bank bases its assumptions on past experience, current projections, comparisons with other banks, and annually tests to verify the validity of its assumptions by reviewing actual results with projected expectations. As the impact of changing interest rates depends on assumptions, actual experience can materially differ from projections. The purpose of the model is to forecast the likely impact of changing interest rates so management can monitor potential exposures to interest rate risk and make adjustments to the balance sheet if needed.

The computer simulation model projects at June 30, 2023 the following changes over a one-year period in net interest income:

#### Interest Rate Risk Simulation Model

(in thousands)

Interest Rate Shock	-4%	-3%	-2%	-1%	1%		2%		3%		4%
Net interest income change	\$ 936	\$ (76)	\$ ,	\$ 		•		•	1,328	•	, -
Net interest percent change	2.4%	-0.2%	-2.4%	-1.8%	1.1%		2.3%		3.5%		4.7%

The Bank's investment portfolio has an average maturity of 9.5 years and would be susceptible to a material decline in market value if interest rates were to materially rise. Management monitors this exposure in relation to the Bank's capital ratios and the interaction of the projected changes in other interest sensitive assets and liabilities to reach a desired balance between current earnings and market risk.

# **Item 4 Controls and Procedures**

#### Management's Evaluation of Disclosure Controls and Procedures

Under the supervision and with the participation of the Bank's management, including its Chief Executive Officer and Chief Financial Officer, the Bank conducted an evaluation of the effectiveness of the design and operation of its disclosure controls and procedures as defined by Rule 13a-15(e) and 15d-15(e) under the Securities Exchange Act (the "Act") of 1934 as of June 30, 2023. The term disclosure controls and procedures means controls and other procedures that are designed to ensure that the information the Bank is required to disclose in its reports that are filed or submitted under the Act is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include controls and procedures designed to ensure that information the Bank is required to disclose in the reports that is filed or submitted under the Act is accumulated and communicated to management, including the principal executive and principal financial officers, or persons performing similar functions as applicable, to allow for timely decisions regarding required disclosures.

Based upon this evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the Bank's disclosure controls and procedures were effective as of the end of the period covered by this report.

#### **Changes in Internal Control Over Financial Reporting**

During the quarter ended June 30, 2023, there were no significant changes that materially affected, or are reasonably likely to materially affect, the Bank's internal control over financial

reporting. The term internal control over financial reporting, as defined by Rule 15d-15(f) of the Act, is a process designed by, or under the supervision of, the issuer's principal executive and principal financial officers, or persons performing similar functions, and effected by the issuer's Board of Directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with U.S. generally accepted accounting principles.

#### PART II OTHER INFORMATION

#### **Item 1 Legal Proceedings**

The nature of our business causes us to be involved in legal proceedings from time to time. As of the date of this report, the Bank is not a party to any litigation where management anticipates that the outcome will have a material adverse effect on the financial position or results of operations.

#### **Item 1A Risk Factors**

In addition to the other information set forth in this Form 10-Q, you should carefully consider the risk factors that appeared under Item 1A, "Risk Factors" in the Bank's 2022 Annual Report. There are no material changes from the risk factors included within the Bank's 2022 Annual Report other than the risks described below.

Recent events impacting the financial services industry could have adverse effects on our business, stock performance, results of operations, and financial condition.

Recent events impacting the financial services industry, including the failure of Silicon Valley Bank, Signature Bank and First Republic Bank, have resulted in decreased confidence in banks among consumer and commercial depositors, other counter parties and investors, as well as significant disruption, volatility and reduced valuations of equity and other securities of banks in the capital markets. These events occurred during a period of rapidly rising interest rates which resulted in unrealized losses in longer duration securities and loans held by banks, more competition for bank deposits, and may increase the risk of a potential recession. These recent events have, and could continue to, adversely impact the market price and volatility of the Bank's common stock.

These recent events may also result in potentially adverse changes to laws or regulations governing banks or result in the impositions of restrictions through supervisory or enforcement activities, including higher capital or liquidity requirements, which could have a material impact on our business. Inability to access short-term funding, loss of client deposits or changes in our credit ratings could increase the cost of funding, limit access to capital markets, or negatively impact overall liquidity or capitalization. We may be impacted by concerns regarding the soundness or creditworthiness of other financial institutions, which can cause substantial and cascading disruption within the financial markets and increased expenses. The cost of resolving the recent bank failures may prompt the FDIC to increase its premiums above the recently increased levels or to issue additional special assessments.

If we are required to sell securities to meet liquidity needs, we could realize significant losses.

As a result of increases in interest rates over the last year, the market value of previously issued government and other debt securities has declined significantly, resulting in unrealized losses in our securities portfolio. While we do not expect or intend to sell these securities, if we were required to

sell such securities to meet liquidity needs, we may incur significant losses, which could impair our capital and financial condition and adversely affect our results of operations. Further, while we have taken actions to maximize our sources of liquidity, there is no guarantee that such sources will be available or sufficient in the event of sudden liquidity needs.

# Item 2 Unregistered Sales of Equity Securities and Use of Proceeds

None.

# **Item 3 Defaults Upon Senior Securities**

None.

# **Item 4 Mine Safety Disclosures**

Not applicable.

# **Item 5 Other Information**

None.

#### **Item 6 Exhibit Index**

The exhibits filed as part of this report are listed on the Exhibit Index filed as part of this report.

Exhibit Number 31.01	Description Certification of Principal Executive Officer pursuant to Rule 13a- 14(a)/15d-14(a) as adopted pursuant to §302 of the Sarbanes-Oxley Act of 2002
31.02	Certification of Principal Financial and Accounting Officer pursuant to Rule 13a-14(a)/15d-14(a) as adopted pursuant to §302 of the Sarbanes-Oxley Act of 2002

#### Exhibit 31.01

# Certification of Principal Executive Officer pursuant to Rule 13a-14(a)/15d-14(a) as adopted pursuant to §302 of the Sarbanes-Oxley Act of 2002

#### I, Brian J. Reed, certify that:

- 1. I have reviewed this quarterly report on Form 10-Q of Summit State Bank (the registrant) for the quarter ended June 30, 2023;
- 2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
- 3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
- 4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

  (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant is made known to us

by others within those entities, particularly during the period in which this report is being prepared;

- (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles:
- (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
- (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
- 5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors:
- (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
- (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
